Introduction

The Mississippi Department of Education (MDE) is dedicated to student success, which includes improving student achievement in English and Language Arts and establishing communication skills within a technological environment. The *2019 Mississippi Alternate Academic Achievement Standards* (MS AAAS) provides a consistent, clear understanding of what students are expected to know and be able to do by the end of each grade level or course. The purpose of alternate standards is to build a bridge from the content in the general education science framework to academic expectations for students with the most significant cognitive disabilities. The standards are designed to be rigorous and relevant to the real world, reflecting the knowledge and skills that students need for success in postsecondary settings.

In special education, prompting is often used to mean a system of structured cues to elicit desired behaviors that otherwise would not occur. In order to clearly communicate that teacher assistance is permitted during instruction of the MS AAAS and is not limited to structured prompting procedures. Guidance and support during instruction should be interpreted as teacher encouragement, general assistance, and informative feedback to support the student.

In an effort to closely align instruction for students with significant cognitive disabilities who are progressing toward individualized postsecondary settings, the *2019 Mississippi Alternate Academic Achievement Standards for English Language Arts* includes grade- and course-specific standards for K-12 English Language Arts. These standards are intended solely for students who have met the criteria for a significant cognitive disability as documented in each student's individualized education program (IEP).

This document is designed to provide special education teachers with a basis for curriculum development. As such, this set of alternate standards addresses a small number of English Language Arts standards, representing a breadth but not a depth of coverage across the entire standards framework. In order to prepare students for postsecondary settings, it outlines what knowledge students should obtain and the types of skills students should demonstrate upon completion of each grade level. The *2019 Mississippi Alternate Academic Achievement Standards* document is aligned to the *Mississippi College- and Career-Readiness Standards* (MS CCRS). The MS CCRS reflects national expectations while focusing on postsecondary success, but it is unique to Mississippi in addressing the needs of our students and teachers.

The following resources served as a foundation for the development of the 2019 MS AAAS for English Language Arts:

- Mississippi's College and Career Readiness Standards (MS CCRS) for ELA
- Dynamic Learning Maps Consortium. (2013). *Dynamic Learning Maps Essential Elements for English language arts*. Lawrence, KS: University of Kansas

The Mississippi Alternate Academic Achievement Standards are based on the Dynamic Learning Maps Essential Elements (DLM EE), with additional edits and clarifications to better support the needs of Mississippi teachers and students. Standards language in italicized font indicates Mississippi-specific standards or adjustments to the DLM EE.

Organization of the 2019 Mississippi Alternate Academic Achievement Standards

The 2019 Mississippi Alternate Academic Achievement Standards (MS AAAS) are aligned to the MS CCRS Standards. The MS AAAS are divided into five sections. The first section includes an introduction to the document and an overview of the Mississippi Alternate Academic Achievement Standards for English Language Arts. The second section includes the MS AAAS for ELA for kindergarten through second grade. The third section includes the MS AAAS for ELA for grades 3 through 5. The fourth section includes MS AAAS for grades 6 through 8. The final section includes MS AAAS for English Language Arts Grades 9 through 12.

Structure of the Standards Document

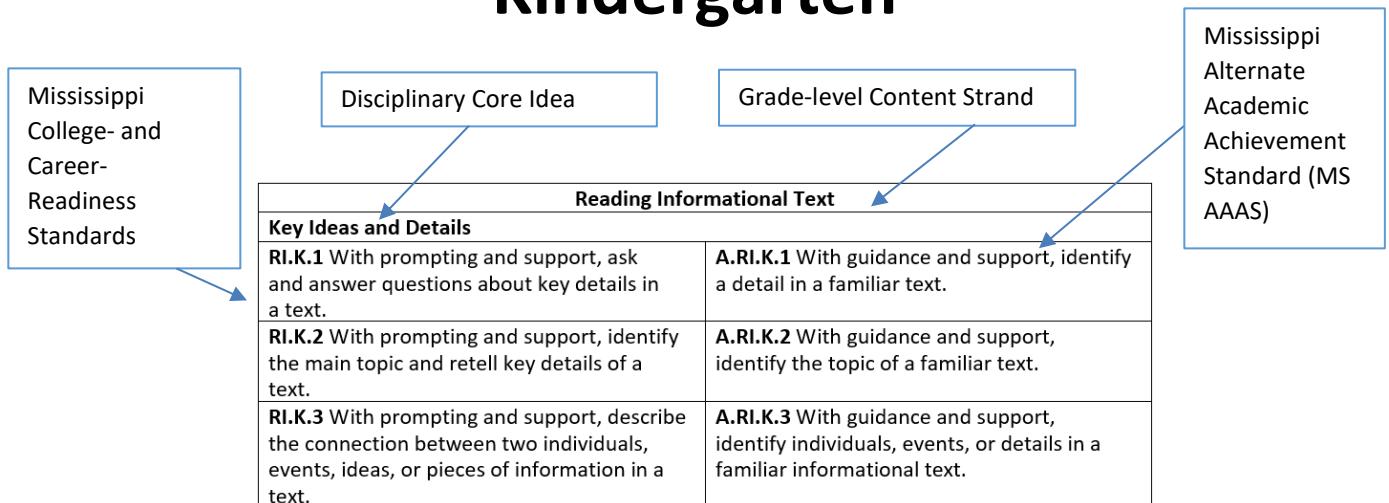

Content strand: Domains into which ELA fields can be divided based on relative content. The four strands identified in the MS AAAS to *English Language Arts* include reading, writing, speaking and listening, and language.

Disciplinary core ideas: The core ideas are the key organizing principles for the development of emphasis on each of the content strands in each grade level. All content strands will be found in each grade level, but all disciplinary core ideas will not be found in every grade level.

Mississippi College and Career Readiness content standard: Each MS AAAS for *English Language Arts* is aligned to a specific MS CCRS for *English Language Arts*. The alignment is displayed in this document as pictured in the image below.

Mississippi Alternate Academic Achievement content standard: The MS AAAS for *English Language Arts* is a general statement of what students with significant cognitive disabilities should know and be able to do as a result of instruction.

Implementation

The 2019 MS AAAS for English Language Arts will be implemented during the 2019-2020 school year.

Mississippi Alternate Academic Achievement Standards (MS AAAS) for English Language Arts Overview

Strategies for Content Area Reading

Though strategies utilized in reading and language arts classes provide the framework that students need to comprehend content-specific texts, students must also be equipped with transferable skills and strategies that can be used across grade levels and curricula. The following are suggestions for content area reading that can be incorporated in all classrooms.

Suggestions for Teaching Content-Specific Vocabulary and Facilitating Comprehension

- Establish goals and purposes for reading.
- Plan pre-reading activities that allow students to develop prerequisite knowledge and vocabulary about content-specific topics. Activities may include reading materials, videos, websites, and field trips.
- Plan post-reading activities that allow students to demonstrate mastery of skills and concepts through visual, kinesthetic, oral, and/or written products. Comprehension is often aided when linked to the creation of a product.
- Create mental or visual images associated with technical vocabulary words.
- Link new vocabulary with background knowledge.
- Focus on the semantic relationships of new and familiar words.
- Use synonyms, antonyms, and dictionary definitions to understand the meaning of specialized and technical vocabulary.
- Analyze the structure of new words (e.g., affixes, compound words, etc.) to determine word meaning.
- Maintain word banks and word walls for new words (**Note:** Word banks and word walls should be interactive; students must regularly interact with words banks and word walls to fully expand their vocabulary and analyze how words and concepts aid in reading comprehension).
- Use semantic gradients (vocabulary continuums) to illustrate a continuum of words by degree. Semantic gradients often feature antonyms or opposites on each end of the continuum. This strategy broadens students' knowledge of related and opposite words.
- Develop activities that allow students to work collaboratively to figure out the meaning of new words.
- Encourage students to generate and ask questions of texts.
- Design activities that allow students to make inferences, predict, summarize, and visualize concepts.
- Examine physical features of texts.

Many of the suggested strategies (e.g., prediction, summarizing, analyzing text features) must be directly taught (explicit instruction) and practiced, while other strategies (e.g., creating visual or mental images) can be components of incidental (implicit) instruction.

Additionally, students must engage in reading, writing, speaking, and listening activities that are authentic and content-specific. Textbooks and discipline-specific texts, such as primary and secondary source documents, articles, tables, and graphs, must be cornerstones in social

studies, science, and technical subjects to aid students in using reading strategies that are discipline specific.

Key Features of the Standards

Reading: Text Complexity and the Growth of Comprehension

The reading standards place equal emphasis on the sophistication of what students read and the skill with which they read. Standard 10 defines a grade-by-grade “staircase” of increasing text complexity that rises from beginning reading to the college and career readiness level. Whatever they are reading, students must also show a steadily growing ability to discern more from and make fuller use of texts, including making an increasing number of connections among ideas and between texts, considering a wider range of textual evidence, and becoming more sensitive to inconsistencies, ambiguities, and poor reasoning in texts.

The following link provides a rubric for determining text complexity of informational and literary texts:

<https://www.mdek12.org/sites/default/files/Offices/Secondary%20Ed/ELA/qualitative-rubrics-for-measuring-text-complexity-informational-and-literary.pdf>

Writing: Text types, Responding to Reading, and Research

The standards acknowledge the fact that whereas some writing skills, such as the ability to plan, revise, edit, and publish, are applicable to many types of writing, other skills are more properly defined in terms of specific writing types: arguments, informative/explanatory texts, and narratives. Standard 9 stresses the importance of the writing-reading connection by requiring students to draw upon and write about evidence from literary and informational texts. Because of the centrality of writing to most forms of inquiry, research standards are prominently included in this strand, though skills important to research are infused throughout the document.

Speaking and Listening: Flexible Communication and Collaboration

Including but not limited to skills necessary for formal presentations, the speaking and listening standards require students to develop a range of broadly useful oral communication and interpersonal skills. Students must learn to work together; express and listen carefully to ideas; integrate information from oral, visual, quantitative, and media sources; evaluate what they hear; use media and visual displays strategically to help achieve communicative purposes; and adapt speech to context and task.

Language: Conventions, Effective Use, and Vocabulary

The language standards include the essential “rules” of standard written and spoken English, but they also approach language as a matter of craft and informed choice among alternatives. The vocabulary standards focus on understanding words and phrases, their relationships, their nuances, and on acquiring new vocabulary, particularly general academic and domain-specific words and phrases.

MS AAAS for English Language Arts Grades K-2

Kindergarten

The alternate standards address a small number of English Language Arts standards, representing a breadth but not a depth of coverage across the entire standards framework. Teaching strategies for students with significant cognitive disabilities should be based on their individual learning goals as outlined in each student’s individualized education program (IEP).

The following standards offer a focus for instruction each year and help ensure that students gain adequate exposure to a range of texts and tasks. Rigor is also infused through the requirement that students read increasingly complex texts through the grades. Students advancing through the grades are expected to meet each year’s grade-specific standards and retain or further develop skills and understandings mastered in preceding grades.

These standards are directed toward fostering students' understanding and working knowledge of concepts of print, the alphabetic principle, and other basic conventions of the English writing system. These foundational skills are not an end in and of themselves; rather, they are necessary and important components of an effective, comprehensive reading program designed to develop

proficient readers with the capacity to comprehend texts across a range of types and disciplines. Instruction should be differentiated: Good readers will need much less practice with these concepts than will struggling readers. The point is to teach students what they need to learn and not what they already know—to discern when particular children or activities warrant more or less attention.

Each year in their writing, students should demonstrate increasing sophistication in all aspects of language use, from vocabulary and syntax to the development and organization of ideas, and they should address increasingly demanding content and sources. Students advancing through the grades are expected to meet each year’s grade-specific standards and retain or further develop skills and understandings mastered in preceding grades. The expected growth in student writing ability is reflected in the standards themselves.

These standards are directed toward fostering students’ understanding and working knowledge of concepts of print, the alphabetic principle, and other basic conventions of the English writing system. These foundational skills are not an end in and of themselves; rather, they are necessary and important components of an effective, comprehensive reading program designed to develop proficient readers with the capacity to comprehend texts across a range of types and disciplines. Instruction should be differentiated: Good readers will need much less practice with these concepts than struggling readers will. The point is to teach students what they need to learn and not what they already know—to discern when particular children or activities warrant more or less attention.

The following standards for Grade 1 offer a focus for instruction each year to help ensure that students gain adequate mastery of a range of skills and applications. Each year in their writing, students should demonstrate increasing sophistication in all aspects of language use, from vocabulary and syntax to the development and organization of ideas, and they should address increasingly demanding content and sources. Students advancing through the grades are expected to meet each year’s grade-specific standards and retain or further develop skills and understandings mastered in preceding grades. The expected growth in student writing ability is reflected in the standards themselves.

MS AAAS for English Language Arts Grades 3-5

Grade 3

The alternate standards address a small number of English Language Arts standards, representing a breadth but not a depth of coverage across the entire standards framework. Teaching strategies for students with significant cognitive disabilities should be based on their individual learning goals as outlined in each student’s individualized education program (IEP).

The following standards offer a focus for instruction each year and help ensure that students gain adequate exposure to a range of texts and tasks. Rigor is also infused through the requirement that students read increasingly complex texts through the grades. Students advancing through the grades are expected to meet each year’s grade-specific standards and retain or further develop skills and understandings mastered in preceding grades.

The alternate standards address a small number of English Language Arts standards, representing a breadth but not a depth of coverage across the entire standards framework. Teaching strategies for students with significant cognitive disabilities should be based on their individual learning goals as outlined in each student’s individualized education program (IEP).

The following standards offer a focus for instruction each year and help ensure that students gain adequate exposure to a range of texts and tasks. Rigor is also infused through the requirement that students read increasingly complex texts through the grades. Students advancing through the grades are expected to meet each year’s grade-specific standards and retain or further develop skills and understandings mastered in preceding grades.

These standards are directed toward fostering students’ understanding and working knowledge of concepts of print, the alphabetic principle, and other basic conventions of the English writing system. These foundational skills are not an end in and of themselves; rather, they are necessary and important components of an effective, comprehensive reading program designed to develop proficient readers with the capacity to comprehend texts across a range of types and disciplines. Instruction should be differentiated: Good readers will need much less practice with these concepts than struggling readers will. The point is to teach students what they need to learn and not what they already know—to discern when particular children or activities warrant more or less attention.

MS AAAS for English Language Arts Grades 6-8

Grade 6

The alternate standards address a small number of English Language Arts standards, representing a breadth but not a depth of coverage across the entire standards framework. Teaching strategies for students with significant cognitive disabilities should be based on their individual learning goals as outlined in each student’s individualized education program (IEP).

Alternate English Elements 10

The alternate standards address a small number of English Language Arts standards, representing a breadth but not a depth of coverage across the entire standards framework. Teaching strategies for students with significant cognitive disabilities should be based on their individual learning goals as outlined in each student’s individualized education program (IEP).

The following standards offer a focus for instruction each year and help ensure that students gain adequate exposure to a range of texts and tasks. Rigor is also infused through the requirement that students read increasingly complex texts through the grades. Students advancing through the grades are expected to meet each year’s grade-specific standards and retain or further develop skills and understandings mastered in preceding grades.

Alternate English Elements 11

The alternate standards address a small number of English Language Arts standards, representing a breadth but not a depth of coverage across the entire standards framework. Teaching strategies for students with significant cognitive disabilities should be based on their individual learning goals as outlined in each student’s individualized education program (IEP).

The following standards offer a focus for instruction each year and help ensure that students gain adequate exposure to a range of texts and tasks. Rigor is also infused through the requirement that students read increasingly complex texts through the grades. Students advancing through the grades are expected to meet each year’s grade-specific standards and retain or further develop skills and understandings mastered in preceding grades.

Alternate English Elements 12

The alternate standards address a small number of English Language Arts standards, representing a breadth but not a depth of coverage across the entire standards framework. Teaching strategies for students with significant cognitive disabilities should be based on their individual learning goals as outlined in each student’s individualized education program (IEP).

The following standards offer a focus for instruction each year and help ensure that students gain adequate exposure to a range of texts and tasks. Rigor is also infused through the requirement that students read increasingly complex texts through the grades. Students advancing through the grades are expected to meet each year’s grade-specific standards and retain or further develop skills and understandings mastered in preceding grades.
