OFFICE OF STUDENT ASSESSMENT

03. Information: Spring 2018 Mississippi Academic Assessment Program (MAAP) results [Goals 1 and 2 – MBE Strategic Plan]

Background Information: The Mississippi Academic Assessment Program (MAAP) is aligned to the 2016 Mississippi College and Career Readiness (CCR) Standards. Students began taking the MAAP in English Language Arts and Math in grades 3-8, English II and Algebra I in 2015-2016.

On July 25, 2016, the Mississippi State Board of Education (SBE) approved the cut scores for the MAAP. The MAAP assessments measure student progress in grades 3 through 8 with annual tests in English Language Arts and Mathematics and in high school Algebra I and English II. MAAP contains five (5) achievement levels: Minimal, Basic, Passing, Proficient and Advanced.

The subgroup gap analysis provided is based on the 2017 and 2018 student assessment data for MAAP English Language Arts (ELA) and Math.

The goal as outlined in the Mississippi *Every Student Succeeds Act (ESSA)* plan is for all student subgroups to reach 70% proficiency in all assessed subject areas by 2025.

This item references Goals 1 and 2 of the *Mississippi Board of Education 2016-2020 Strategic Plan*.

Mississippi Academic Assessment Program (MAAP) 2018 Results Summary

What is MAAP?

- The Mississippi Academic Assessment Program (MAAP) measures students' knowledge, skills, and academic growth from elementary through high school.
- Student progress is measured from grades 3 through 8 with annual assessments in English Language Arts (ELA) and mathematics and in high school Algebra I and English II.
- MAAP assessments are designed to let parents know how their child is progressing and to provide teachers with information to guide instruction.

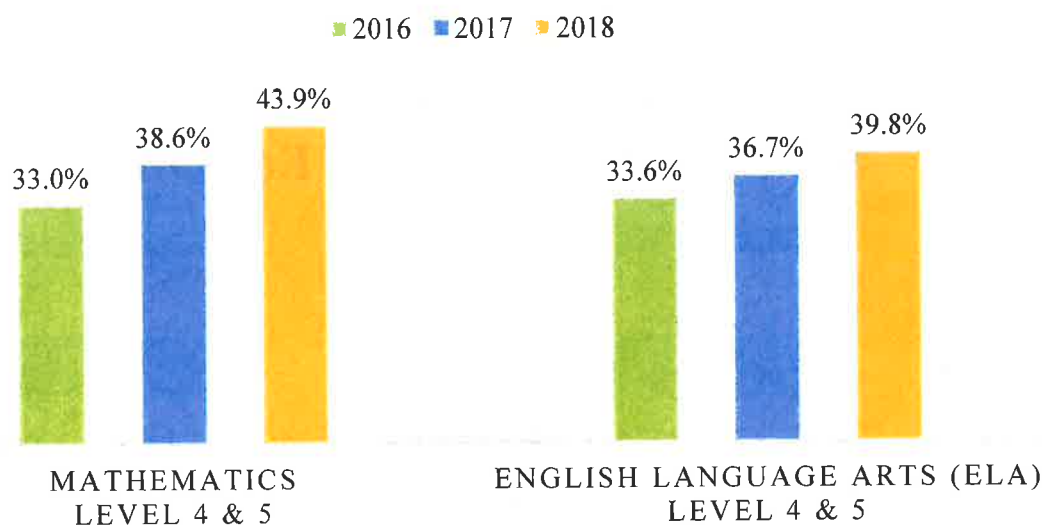

MAAP Administration

- The Fall 2017 MAAP end of course assessment was administered from November 27 – December 15, 2017.
- The Spring 2018 MAAP assessment was administered from April 16 – May 18, 2018.
- MAAP was administered online for all students.
- Students with disabilities and English learners were afforded testing accommodations including paper-pencil forms, if needed.

MAAP Reporting

- MAAP results are reported in two ways for both Mathematics and ELA. Each student receives a scale score (1 to 99 points) and a performance level (*Level 1*, *Level 2*, *Level 3*, *Level 4*, or *Level 5*).

Mathematics Results and Key Findings

Number of Mathematics Students Tested

- For grades 3-8 and high school mathematics, **248,341** students participated and received scale scores for the 2016 MAAP. **251,951** students participated and received scale scores for the 2017 MAAP. For the 2018 MAAP, **253,519** students participated and received scale scores. Algebra I students were test takers who did not take a prior Algebra I test (including MAAP, PARCC and SATP).

Achievement Gap Methodology

Achievement gap analysis identifies any disparity in assessment proficiency between subgroups of Mississippi's student population. As part of the Mississippi Consolidated State Plan for the *Every Student Succeeds Act* (ESSA), Mississippi aims to eliminate, or close, the assessment proficiency gap between student subgroups by 2025.

Assessment proficiency is defined as scoring at Level 4 or higher on a 1 – 5 proficiency scale for the yearly subject area assessments, where

- Level 1 is minimal proficiency in subject area
- Level 2 is basic proficiency in subject area
- Level 3 is “passing” proficiency in subject area
- Level 4 is proficiency in subject area
- Level 5 is advanced proficiency in subject area

The current achievement gap analysis is based on the 2017 and 2018 student assessment data for English Language Arts and Mathematics. To remain consistent with methodology used by other states across the nation, the MDE Office of District and School Performance has modified the gap analysis of the 2017 and 2018 assessment data to include only the assessment information on the *first* attempt of the subject area exam for each student, each year. For 8th grade students double testing in 8th grade math and Algebra I, only the 8th grade math assessment information is used.

To calculate the gap, the percentage of students scoring at Level 4 or higher is calculated at the State and District level for each student subgroup. The categories of student subgroups include:

- Race
 - White (reference)
 - African-American
 - Hispanic
 - Asian
 - Multiracial
 - Native American/Pacific Islander
- Economic Status
 - Not Economically Disadvantaged (reference)
 - Economically Disadvantaged
- Disability Status
 - Students without Disabilities (reference)
 - Students with Disabilities
- English Language Status
 - Not Limited English Proficiency (reference)
 - Limited English Proficiency
- Gender
 - Male (reference)
 - Female

In each category of student subgroups a reference subgroup is determined, based either on it being the larger of the subgroups or because it has the fewest impediments to educational learning. Once the reference group is determined, the other subgroups in the category are compared to the reference group to determine the achievement gap:

Example:

% proficient in Math for White students = 52.7

% proficient in Math for Hispanic students = 40.0

Gap = $40.0 - 52.7 = -12.7\%$

An Increase/Decrease in achievement gap was also calculated for each subgroup to gauge the progress toward closing the proficiency gap between 2017 and 2018. An increase indicates the achievement gap widened, while a decrease indicates the achievement gap closed.

The Mississippi Department of Education ESSA goal is for all student subgroups to reach 70% proficiency in all assessed subject areas by 2025. The Gap to State 2025 Goal is the difference between the percent proficient for the student subgroup and 70%.

If the number of students for a subgroup is less than ten (<10), the information for the subgroup is redacted with an asterisk (*). Additionally, if the number of students *tested* for a subgroup is less than ten (<10), the information for the subgroup is redacted with an asterisk (*).

Technical Notes:

- Gap analysis identifies any disparity in assessment proficiency between student subgroups. For example, the gap (or difference) between the percentage of proficient African-American students and the percentage of proficient White students:
 % Proficient White students (reference) = 51.3
 % Proficient African-American students = 22.4
 Gap: 22.4 - 51.3 = -28.9%
- Grey shading indicates the reference subgroup, except the "All Students" category which is not being used for comparison
- A negative gap indicates lower performance in the comparison subgroup when compared to the reference subgroup. A positive gap indicates higher performance in the comparison subgroup when compared to the reference subgroup
- The Increase/Decrease in achievement gap indicates whether the gap widened (an increase) or closed (a decrease) between 2017 and 2018
- The Gap to State 2025 Goal is the difference between the percent proficient for the subgroup and 70%

Technical Notes:

- Gap analysis identifies any disparity in assessment proficiency between student subgroups. For example, the gap (or difference) between the percentage of proficient African-American students and the percentage of proficient White students:
 $\% \text{ Proficient White students (reference)} = 51.3$
 $\% \text{ Proficient African-American students} = 22.4$
 $\text{Gap: } 22.4 - 51.3 = -28.9\%$
- Grey shading indicates the reference subgroup, except the "All Students" category which is not being used for comparison
- A negative gap indicates lower performance in the comparison subgroup when compared to the reference subgroup. A positive gap indicates higher performance in the comparison subgroup when compared to the reference subgroup
- The Increase/Decrease in achievement gap indicates whether the gap widened (an increase) or closed (a decrease) between 2017 and 2018
- The Gap to State 2025 Goal is the difference between the percent proficient for the subgroup and 70%
