21 Introduction

The Mississippi Department of Education is in the process of implementing a statewide Mississippi Student Information System (MSIS). The primary goal of the MSIS project is to develop a comprehensive management information system which provides the education community with timely and accurate data collection and reporting of student and school district personnel information. Data will be transmitted from the School Administration packages into MSIS during an initial load, daily, and monthly process. An encryption process using Hypertext Transfer Protocol Secure (HTTPS) and Secure Socket Layer (SSL) technology will be used for these transmissions.

Before the first student data transmission from the School Administration packages to the MSIS occurs, a unique MSIS ID number must be assigned to each student. A process has been established to provide for the initial load of student data to set up the base student record in MSIS. The School Administration packages must provide a file of active students from each school. The file should contain a student's District Number, School Number, First Name, Last Name, Birth Date, a unique student ID number, and the student's Middle Initial and social security number, if available. The unique student ID number will be the unique identifier for the students within the vendor specific package. The data will be transferred in a common file format to MSIS using the FTP transport mechanism. *The FTP mechanism will only be used for the initial load.* Each school or district will be asked to transmit their student file at a specified time. Once the file has been transferred, each student record will be assigned an MSIS ID number, as detailed in the *Student Identifier Technical White Paper*. Once all students in a school have been assigned an MSIS ID number, a file will be created containing the new MSIS ID number and the unique student ID number. This file should be loaded into the School Administration packages. This initial load would be a completely separate entity, separate from routine MSIS processing, not to be repeated. Once the file is loaded into the School Administration packages, student level data should exchange between the School Administration packages and MSIS through the daily and monthly processes.

The MSIS will collect student level data electronically from the School Administration Packages at each school or district office. The data will be transferred in a common file format to MSIS using the HTTPS transport mechanism as specified in this interface specification. Once transferred, the district office will review, request corrections from schools as required, and then approve the data for their district. Once approved, the data will be available in MSIS for statewide use. This will typically be performed on a monthly cycle during the school year.

The MSIS will also provide the ability for a Student Administrator at a school to download an electronic student historical record for a particular student from MSIS to their local computer. This would be used when a student transfers to a new school. If the School Administration Package at the new school supports the import of the electronic student historical record, then this data can be captured electronically and the need for personnel at the new school to key the information in is eliminated. The format of the electronic student historical record from MSIS to the school is identical to the format from the school to MSIS. This format is defined in this interface specification.

MSIS will also have the capability to collect certain student information electronically from the School Administration Packages at each school on a daily basis. ***This data will be transmitted directly into MSIS and will not be reviewed by the district office.*** Once transmitted, the student data will be available for viewing in MSIS. This data is to be used for informational purposes; only the approved monthly attendance transmission should be used in reporting, funding, student assessment, and school accreditation. The transfer of data to MSIS will be in a format that is similar to the monthly transmission.

MDE has requested that student discipline and indicators identifying students who have recently obtained special education status be transmitted to MSIS from the School Administration packages on a daily basis. For student discipline, only records with the disposition type of Suspension (out of school suspension) or Expulsion should be transferred. The special education indicator should be transmitted the day the student is categorized as a special education student.

Note: Student data that is transmitted monthly will overlay the daily student transmissions. Data that is transmitted daily can be included in the monthly transmissions. **Once the data is approved by the district, there will not be any changes made to the data in MSIS.** You can make changes to the school level data even if you have already approved at the school level but **not if you have approved at the district level.**

21.1 Purpose

The purpose of this Interface Specification is to provide the information necessary to transfer data from a School Administration Package to MSIS for the initial load, monthly transmissions, and daily transmissions. In addition, it defines the electronic student historical record format for import into a School Administration Package.

21.2 How to Use This Document

This interface specification provides an overview of the data exchange process, including definitions and standards; hardware, software, and communications requirements; and a step-by-step approach to implementing the interface with MDE.

21.3 How This Document Is Organized

The remainder of this document is divided into *three* sections plus appendices, designed to answer a wide range of questions involving the operational considerations, and the technical requirements for implementing the School Administration Package interface with MSIS.

- Section 2 provides an introduction to the electronic form of MSIS data exchange documents (transaction sets).
- Section 3 specifies the technical requirements for implementing the interface, including hardware, software, and telecommunications.
- Section 4 provides the testing guidelines.
- Appendix A contains the definitions of the data elements.
- Appendix B contains the definitions of the XML formatted MSIS transactions.

- Appendix C contains definitions of the Enumerate List(s) and by the frequency in which they shall be transmitted to MSIS.
- Appendix D contains the Support tables that are referenced in the data element table in Appendix A.

21.4 Definitions

This table provides a brief introduction to a variety of terms and acronyms that are used in this Interface Specification.

Term	Description
Data Element	A singular piece of data in a data exchange.
Transaction Set	A standard format MSIS data exchange file.
Transaction	A set of related data within a transaction set.
XML	eXtensible Markup Language, a flexible way to create information formats and share both the format and the data on the World Wide Web, intranets, and elsewhere.

Table 1-1 Definition of Terms

22 MSIS Data Exchange Description

22.1 Overview of eXtensible Markup Language (XML)

MSIS has selected the eXtensible Markup language (XML) as the underlying format for the data exchange with the School Administration packages. In XML, each data element is contained within a start and an end tag which are enclosed in “<>”, whereby the end tag is the same as the start tag, preceded by a slash “/”.

For example,

```
<DATE>04142022</DATE>
```

is the XML representation of a date.

Tagged data can also be organized hierarchically to put the data into context. For example:

```
<BIRTH>  
    <DATE>04141995</DATE>  
    <CITY>Jackson </CITY>  
    <STATE>MS</STATE>  
</BIRTH>
```

puts the Date, City, and State into context within the tag <BIRTH>.

The definition of the valid tags and how each is to be processed is provided along with the XML file, or document, in the Document Type Definition (DTD). MSIS will provide the DTD for the School Administration Package Interface.

Commercial (including free) XML parsers are readily available for validating and parsing an XML file, or document, by using it's DTD.

22.2 MSIS Transaction Set Structure

An XML data exchange consists of a set of data elements, each of which represents a singular fact, such as a price, product model number, etc. When using XML, each data element is identified by start and end tags. *Each Transaction set must adhere to the specified order of tags.* MSIS will be using a validating XML parser in accordance with a separate stand-alone Document Type Definition (DTD) for each of the Transaction sets.

One or more data elements framed by a header and trailer form a transaction. A transaction set, which is the MSIS unit of transmission (equivalent to a file), consists of one or more transactions framed by a transaction set header and trailer.

Figure 22.1 illustrates the overall structure of an MSIS transaction set. The Transaction set is contained within an envelope, which begins with a header. One or more transactions follow. Transactions contain one or more data elements, defined and given context by the organization of the XML tags. The end of the transaction set is identified at the end of the envelope.

The specific structure of the MSIS data exchange envelope and each of the transactions is defined in Appendix B. The individual data elements are defined in Appendix A.

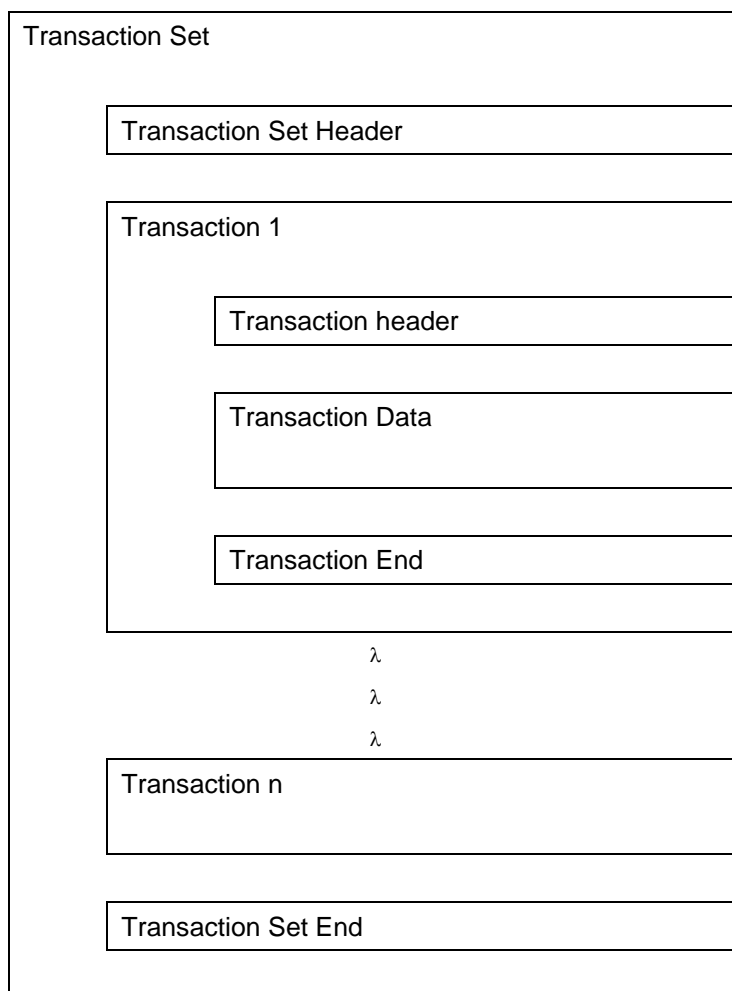

Figure 22.1 Transaction Set Structure

22.3 Transaction Set Flow

Each Transaction set received from a School Administration Package by MSIS is responded to with a Transaction Result. The Transaction Result identifies any errors found when processing the transaction set.

22.4 Initial - MSIS - School Administration Package Transactions

The subsections that follow provide a brief description of the MSIS – School Administration Package Initial Load transaction. The specific structure of each transaction is defined in Appendix B.

22.4.1 Initial - Student Load

The Initial Load transaction is used by School Administration Packages to transmit student data to set up the base student record in MSIS. This transmission will assign an MSIS ID to each student in each school or district, so that a student’s instructional growth

can be tracked throughout the state of Mississippi. **This transmission will occur only once, and will not be repeated.**

22.4.2 Initial - MSIS ID File

The MSIS ID file transaction will be used by the School Administration packages to load the newly assigned MSIS ID for each student in their respective packages. Computer Sciences Corporation will produce a file for each school or district containing the newly assigned MSIS ID number and the unique student identifier for each student. The unique student identifier will be specific to a school's administration package.

22.4.3 Initial - MSIS Transaction Result

The Initial - MSIS Transaction Result is the required response to each Transaction received and processed by MSIS. If the transaction status is not SUCCESS, then a Transaction Result file is returned with an identification of the error.

22.5 Monthly - MSIS - School Administration Package Transactions

The subsections that follow provide a brief description of each Monthly - MSIS - School Administration Package Version transaction. The specific structure of each transaction is defined in Appendix B.

22.5.1 Monthly - Student Data

The Student Data transaction is used by School Administration Packages to transmit student level data to MSIS for use in reporting, funding, student assessment, and school accreditation.

22.5.2 Monthly - Student Historical Record

The Student Historical Record transaction is used by School Administration Packages to transmit the electronic student historical record to MSIS. The school at which a student is registered can download the electronic student historical record from MSIS at any time. This capability will typically be used when a student transfers to a new school. The format of the electronic student historical record is the same as for the student historical record transaction. The Transaction Result is produced by MSIS when the student historical record transaction is received from a School Administration Package. The Transaction result is not provided, however, when an electronic student historical record is downloaded by a student administrator to a school.

22.5.3 Monthly - MSIS Transaction Result

The Monthly - MSIS Transaction Result is the required response to each Transaction received and processed by MSIS. If the transaction status is not SUCCESS, then a Transaction Result file is returned with an identification of the error.

22.6 Daily - MSIS - School Administration Package Transactions

The subsections that follow provide a brief description of each Daily - MSIS - School Administration Package Version transaction. The specific structure of each transaction is defined in Appendix B.

22.6.1 Daily - Student Data

The Daily Student Data transaction is used by School Administration Packages to transmit student level data daily (Special Education Indicators and Discipline) to MSIS for information use only.

22.6.2 Daily - MSIS Transaction Result

The Daily - MSIS Transaction Result is the required response to each Transaction received and processed by MSIS. If the transaction status is not SUCCESS, then a Transaction Result file is returned with an identification of the error.

22.7 Summer School – MSIS – School Administration Package Transactions

The subsections that follow provide a brief description of each Summer School – MSIS – School Administration Package Version transaction. The specific structure of each transaction is defined in Appendix B.

22.7.1 Summer School – Student Data

The Summer School Student Data transaction is used by School Administration Packages to transmit summer school data to MSIS for use in graduation, promotion, and student transcript reports.

22.7.2 Summer School – MSIS Transaction Result

The Summer School – MSIS Transaction Result is the required response to each Transaction received and processed by MSIS. If the transaction status is not SUCCESS, then a Transaction Result file is returned with an identification of the error.

23 Technical Environment

This subsection of the document describes the features of the MSIS implementation of the interface.

23.1 Communications

The internet will be used for communication between MSIS and the School Administration Packages.

The transport mechanism is the means by which the transaction sets are transferred between the MSIS server and the School Administration Package servers. Hypertext Transfer Protocol Secure (HTTPS) will be the transport mechanism used for this interface.

The School Administration Packages will send (post) MSIS transaction sets via the internet to the MSIS server. The MSIS server will utilize an XML parser for compliance and validity checking. If the data passes the validity check, MSIS will import the data for district approval. The results of the XML parser and subsequent import will be contained in a Transaction Set containing a Transaction Result for each transaction. This transaction set will be available for the school of origin to transfer (get) back.

Encryption of the data transfers is required. MSIS has selected Secure Socket Layer (SSL) encryption in conjunction with HTTPS for guaranteeing the security of the data being transmitted over-the-wire.

23.2 Software

Each School Administration Package server is required to have client browser software capable of supporting HTTPS (specifically Internet Explorer 10.x or higher) and access to the internet. Each school or school district will have access to an inbox and an outbox where School Administration Package to MSIS transaction sets and MSIS to School Administration Package Transaction Result transaction sets will be located, respectively. MSIS will remove transaction set files from the inboxes and outboxes after a given amount of time has passed since they were accessed by the respective recipient.

23.3 Hardware

The selection of HTTPS as the communications transport mechanism allows for flexibility in the hardware platforms employed by the School Administration Packages. The MSIS platform utilizes Sun Microsystems hardware, more specifically the Sun T5220 and T2000 enterprise class servers running the Solaris 10 operating system. Each School Administration Package can employ any combination of hardware and operating system, as long as it has access to an HTTPS browser client (e.g. Internet Explorer) for posting and getting transaction sets to and from the MSIS web server.

24 Testing the Interface

24.1 Testing Process

Testing is required to ensure the accuracy of all components of the interface implementation. Testing ensures that:

- The send and receive facilities are operational;
- Translation and mapping software are functioning properly; and
- Data is accurately mapped, translated, and transmitted between a Student Administration Package and the MSIS server.

Three types of testing shall be performed by MSIS and all School Administration Packages to ensure the integrity of the interface implementation: standalone testing, connectivity testing, and integration testing. This testing will be performed with a pilot set of MDE approved School Administration Software installations.

Standalone testing shall consist of a manual review of each transaction set generated by the School Administration Package software. All possible scenarios should be considered when selecting sample data.

Each pilot School Administration Package administrator will test the connectivity with the MSIS web server. Once connectivity is established, the transaction sets from the standalone testing will be exchanged. The format of the exchanged data will be verified.

Once the test transactions and connectivity are verified, an integration test period is established. The School Administration Package vendors will enable their pilot software to exchange data in an automated fashion. Transactions that are not successful will be evaluated and recommendations for correction made. This process will continue until mutual satisfaction is reached between MSIS and the School Administration Package vendors.

24.2 Testing Instructions

To be Supplied.

24.3 Ongoing Support

During the testing phase a help desk will be set-up at MDE for the first level of support. MDE will route the calls to the appropriate school package vendor, Computer Sciences Corporation, or MDE personnel. In addition, MSIS email accounts will be established in which users can email their questions or problems directly to MDE or Computer Sciences Corporation.

A. Data Element Definitions Appendix

Transactions are comprised of data segments, which are groups of data elements. This section defines the MDE School Package data elements. They are presented in alphabetic order, below. The data types of the data elements are all ASCII text, and are further defined in the table as: A (alphanumeric), N (numeric), D (date), or DT (date time).

Data Element Name	Description	Data Type	Size (bytes)	Value/Format
AbsenceCause	Chief cause of days absent during a school grade	A	255 (max)	
AbsenceDate	Date of a particular absence	D	10	See below
AcademicPassingInd	Academic Course Passing indicator	A	1	'Y' – YES 'N' – NO
AliasFName	Student's alias first name	A	20 (max)	
AliasLName	Student's alias last name	A	20 (max)	
AliasMName	Student's alias middle name	A	20 (max)	
AltDistrictNum	Alternative district number that student was sent to as part of disciplinary action	N	4	From MDE District Codes Table <i>See Attachments Appendix D.4</i>
AltSchoolNum	Alternative school number that student was sent to as part of disciplinary action	N	3	From MDE School Codes Table <i>See Attachments Appendix D.11</i>
BirthCertFileNum	Certified Birth Certificate File Number	A	20 (max)	
BirthCertVerify	Initials of person that verified the Certified Birth Certificate	A	3 (max)	
BirthCity	City of student's birth	A	30 (max)	
BirthCounty	County of student's birth	A	30 (max)	
BirthDate	Student's birth date	D	10	See below
BirthState	Student's birth state (if applicable)	A	2	
Calc_Grade	Calculated Test Grade Level associated with student data based upon age of student	N	2	From MDE Calc Grade Level Codes Table <i>See Attachments Appendix D.9</i>
CapstoneInd	Indicator that student has completed two-year Occupational program and entered job in that field	A	1	'Y' – YES 'N' – NO

Data Element Name	Description	Data Type	Size (bytes)	Value/Format
CarnegieUnits	The Carnegie Units earned by a student for a class	A	3	From MDE Carnegie Units Table <i>See Attachments Appendix D.1</i>
ClassPeriod	Period that particular class of a course is taught	N	2	valid entries are the numbers 1 through 99
ClassMinutes	Minutes student is assigned to attend that particular class	N	2	valid entries are the numbers 1 through 499
CompExamInd	Comprehensive Exam passed or failed indicator	A	1	'P' - passed 'F' - Failed 'W' - withdraw
CompProfileInd	Competency profile passed indicator for vocational course or program	A	1	'P' - passed 'F' - Failed 'W' - withdraw
ConditionType	Type of medical condition that student had.	A	20 (max)	From Condition Type List <i>See Appendix C</i>
ConditionYear	Calendar year that student had a medical condition	N	4	YYYY
ContEdAcademicInd	Indicates vocational student continuing education in academic programs	A	1	'Y' - YES 'N' - NO
ContEdPSVocInd	Indicates Secondary vocational student who is a graduating senior and will be continuing education in a post-secondary vocational program.	A	1	'Y' - YES 'N' - NO
ContEdVocInd	Indicates vocational student continuing education in vocational programs	A	1	'Y' - YES 'N' - NO
CourseName	Name of course. This applies to Elementary Courses included in the student historical record.	A	35 (max)	<i>See Appendix C for examples in Elementary Course Name List</i>
CourseCode	Course Code	N	6	From MDE Course Code Table <i>See Attachments Appendix D.3</i>
CourseSection	Section for particular class of a course	A	5 (max)	
CourseTermSem	The Term or semester in which a course is being taken.	A	2	From Term, Semester List <i>See Appendix C</i>

Data Element Name	Description	Data Type	Size (bytes)	Value/Format
Credits	Credits for the course or class	N	4	
CurrentGradeLvl	The current grade level that the student is in	N	2	From MDE Grade Level Codes Table <i>See Attachments Appendix D.8</i>
DateTimeGroup	A date and time stamp	DT	24	See Below
DaysOffRoll	Number of days that a student is not enrolled as a result of late entry, withdrawal, or transfer during the reporting period.	N	3 (max)	
DaysTaughtGrade	Number of Days taught during the reporting period for each grade.	N	3(max)	
DaysTransported	Number of Days a student was transported to school during the current reporting period	N	3 (max)	
DisabledInd	Special Vocational population - disabled indicator	A	1	'Y' – YES 'N' – NO
DisadvantagedInd	Special vocational population – disadvantaged indicator	A	1	'Y' – YES 'N' – NO
DispDesc	Text description from discipline officer regarding action taken to resolve the student incident related to disciplinary action	A	255 (max)	
DispDuration	Number of days of disciplinary action	N	3 (max)	
DispEndDate	Ending date of the disciplinary action	D	10	See Below
DispHomemakerInd	Special vocational population – displaced homemaker indicator	A	1	'Y' – YES 'N' – NO
DispStartDate	First date that disciplinary action applies	D	10	See Below
DispType	The type of action taken to resolve the student incident related to disciplinary action	A	4 (max)	From Disposition Type List <i>See Appendix C</i>
DistrictNum	The number of the school district at which the student is enrolled	N	4	From MDE District Codes Table <i>See Attachments Appendix D.4</i>

Data Element Name	Description	Data Type	Size (bytes)	Value/Format
DropoutCode	Valid dropout code	A	2 (max)	From MDE Dropout Reentry Codes Table <i>See Attachments Appendix D.5</i>
EmergCity	Emergency contact city	A	30 (max)	
EmergFirstName	Emergency contact first name	A	20 (max)	
EmergLastName	Emergency contact last name	A	20 (max)	
EmergPhoneExt	Emergency contact phone number extension	A	4 (max)	
EmergPhoneNum	Emergency contact phone number	A	10	<i>Numeric (no dashes or parens)</i>
EmergRel	The relationship of the emergency contact to the student (e.g. Father, Guardian).	A	10 (max)	
EmergState	Emergency contact state	A	2	
EmergAddr1	Emergency contact address line 1	A	35 (max)	
EmergAddr2	Emergency contact address line 2	A	35 (max)	
EmergWorkExt	Emergency contact work phone number extension	A	4 (max)	
EmergWorkNum	Emergency contact work phone number	A	10	<i>Numeric (no dashes or parens)</i>
EmergWorkPlace	Emergency contact place or employment	A	255 (max)	
EmergZip	Emergency contact zip code	N	5	
EmergZip4	Emergency contact zip code +4	N	4	
EmpInFieldInd	Indicates that vocational student is employed in field for which they trained	A	1	'Y' – YES 'N' – NO
EmpNotRelFieldInd	Indicates that vocational student is not employed in field related to training	A	1	'Y' – YES 'N' – NO
EmpRelFieldInd	Indicates that vocational student is employed in field related to training	A	1	'Y' – YES 'N' – NO
EntranceCode	Valid school admission code	A	2	From MDE Entry & Withdrawal Codes Table <i>See Attachments Appendix D.6</i>
EntranceDate	Date of school admission	D	10	See Below

Data Element Name	Description	Data Type	Size (bytes)	Value/Format
EntranceGrade	Grade student placed in on admission to school	N	2	From MDE Grade Level Codes Table <i>See Attachments Appendix D.8</i>
EthnicityCode	Ethnicity type code	A	2	From MDE Race Codes Table <i>See Attachments Appendix D.10</i>
ErrorHierarchy	Hierarchy path to where the error occurred	A	255 (max)	
ErrorType	Reason for a transaction status of WARNING or FAILURE	A	11 (max)	'MISSING' – data is required, but missing 'INVALID' – data supplied is not valid 'NOT ALLOWED' - data item is not part of the transaction data set as it appears
ErrorValue	Value that caused the error	A	255 (max)	
ExcusedInd	Indicator of whether of not a particular absence was excused	A	1	'Y' – YES 'N' – NO
FactAge	Student's Age when the significant fact occurred	N	2 (max)	
FactDesc	Description of Significant Fact	A	255 (max)	
FactEntryDate	Date that a significant fact is entered	D	10	See Below
FactFromDate	Starting date related to significant fact	D	10	See Below
FactGrade	Grade level of student when a significant fact occurred	N	2	From MDE Grade Level Codes Table <i>See Attachments Appendix D.8</i>
FactPerson	Person revealing significant fact	A	50 (max)	
FactToDate	Ending date related to significant fact	D	10	See Below
FatherFirstName	Father's first name	A	20 (max)	
FatherLastName	Father's last name	A	20 (max)	
FExchange	Foreign Exchange Student	A	1	'Y' – YES 'N' – NO
FinalGrade	Final grade for a course	A	3 (max)	
FiveOFour	Section 504 Tutored	A	1	'Y' – YES 'N' – NO
GenderCode	Gender type code	A	1	From MDE Gender Codes Table <i>See Attachments Appendix D.7</i>

Data Element Name	Description	Data Type	Size (bytes)	Value/Format
GiftedStudentInd	Student gifted indicator	A	1	'Y' – YES 'N' – NO
GiftedStudentDesc	Type of gifted student	A	1	From Gifted Type List <i>See Appendix C</i>
GraduationType	Type of graduation	A	10 (max)	From MDE Graduation Type Codes Table <i>See Attachments Appendix D.9</i>
GradeLevel	Grade Level associated with student data	N	2	From MDE Grade Level Codes Table <i>See Attachments Appendix D.8</i>
GradEligibleInd	Vocational student graduation eligibility indicator	A	1	'Y' – YES 'N' – NO
GuardianFirstName	Guardian's first name	A	20 (max)	
GuardianLastName	Guardian's last name	A	20 (max)	
IEPInd	Individual Educational Plan (IEP) program indicator	A	1	'Y' – YES 'N' – NO
IEPPassedInd	Individual Educational Plan (IEP) passed indicator	A	1	'Y' – YES 'N' – NO
ImmunCertDate	Date of Immunization Certificate of Compliance	D	10	See Below
ImmunCertVerify	Initials of verifier of Immunization Certificate of Compliance	A	3 (max)	
IncidentDate	Date of student incident related to disciplinary action	D	10	See below
IncidentDesc	Description of student incident related to disciplinary action	A	255 (max)	
IncidentLocCode	Location of student incident related to disciplinary action	A	1	<i>One of</i> 'S' – School 'B' – Bus 'O' – Off School property
IncidentRepByFstN	First Name of person that reported the student incident related to disciplinary action	A	20 (max)	
IncidentRepByLstN	Last Name of person that reported the student incident related to disciplinary action	A	20 (max)	

Data Element Name	Description	Data Type	Size (bytes)	Value/Format
IncidentReportedByCode	Type of person that reported the student incident related to disciplinary action	A	1	'S' – School personnel 'N' – Non-school personnel 'T' – Student 'O' – Non-student (other)
IncidentType	Student incident type related to disciplinary action	A	5 (max)	From Incident Type List See Appendix C
LegalFirstName	Student's legal first name	A	20 (max)	
LegalLastName	Student's legal last name	A	20 (max)	
LEPInd	Limited English Proficiency (LEP) program indicator	A	1	'Y' – YES 'N' – NO
LineNum	Line number where the error occurred	N	9 (max)	
LocalName	Name of local course.	A	35 (max)	
LocalCode	Course code assigned to a local course, which is mapped to a state-level generic course code	A	15	
MiddleName	Student's middle name	A	20 (max)	
MigrantInd	Migrant student indicator	A	1	'Y' – YES 'N' – NO
MilitaryInd	Indicates that vocational student enlisted in the military	A	1	'Y' – YES 'N' – NO
MotherFirstName	Mother's first name	A	20 (max)	
MotherLastName	Mother's last name	A	20 (max)	
MSISStudentID	Mississippi Unique Identifier which identifies a student	A	9	
NonEmpInd	Indicates that vocational student is not employed	A	1	'Y' – YES 'N' – NO
NonTraditionalInd	Special vocational population – non-traditional gender indicator	A	1	'Y' – YES 'N' – NO
OtherEmpInd	Indicates that vocational student has passed away, been arrested	A	1	'Y' – YES 'N' – NO
PassFollowUpInd	Indicates that vocational student has passed the course and shall be follow-up on the Follow-Up Enrollment Report	A	1	'Y' – YES 'N' – NO
PassingGrades	Passing grades for elementary grade	A	30 (max)	

Data Element Name	Description	Data Type	Size (bytes)	Value/Format
PathwayInd	Graduation Option	A	2	'C' - CAREER PATHWAY 'D' - DISTRICT PATHWAY 'T' - TRADITIONAL PATHWAY 'DE' - DISTINGUISHED ACADEMIC ENDORSEMENT 'AE' - ACADEMIC ENDORSEMENT 'CE' - CAREER AND TECHNICAL ENDORSEMENT
P_Grade	Grade Level associated with student data based upon age of student	N	2	From MDE Grade Level Codes Table <i>See Attachments Appendix D.8</i>
PermCity	Permanent address city	A	30 (max)	
PermCounty	Permanent county	A	2	From MDE County Codes Table <i>See Attachments Appendix D.2</i>
PermPhoneNum	Permanent address phone number	N	10	<i>(no dashes or parens)</i>
PermState	Permanent address state	A	2	
PermAddr1	Permanent address line 1	A	35 (max)	
PermAddr2	Permanent address line 2	A	35 (max)	
PermZip	Permanent address zip	N	5	
PermZip+4	Permanent address zip+4	N	4	
PGFirstName	Parent or guardian first name	A	20 (max)	
PGLastName	Parent or guardian last name	A	20 (max)	
PGMilitary	Parent or guardian in the Military	A	1	'Y' - YES 'N' - NO
PGMType	Active Duty or National Guard	A	2	'AD' - Active Duty 'NG' - National Guard
Pll	Permission to release Personal Identifiable Information	A	1	'Y' - YES 'N' - NO
PrePostTestInd	Whether the student at completer level demonstrated academic gain on the pre-test/post-test series	A	1	'Y' - YES 'N' - NO

Data Element Name	Description	Data Type	Size (bytes)	Value/Format
PrevSchoolAddr	Address of school from which student is transferring	A	100 (max)	
PrevSchoolName	Name of school from which student is transferring	A	35 (max)	
PromoteDate	Date Student was promoted	D	10	
PromoteInd	Indicates whether student is being promoted to next grade level	A	1	'Y' – YES 'N' – NO
RecordSentDate	Date that pupil record was sent	D	10	See Below
RecRecipientAddr	Address of recipient of pupil record	A	100 (max)	
RecRecipientName	Name of recipient (usually school) of pupil record	A	35 (max)	
ReentryCode	Valid reentry code	A	2 (max)	From MDE Dropout Reentry Codes Table <i>See Attachments Appendix D.5</i>
ReentryDate	Date that student reenters school from dropout	D	10	See Below
ReentryGrade	Grade that student reenters school from dropout	N	2	From MDE Grade Level Codes Table <i>See Attachments Appendix D.8</i>
RepPeriod	The Reporting Period for the current transaction set.	N	2	Currently 01 through 09
ResidentDistrictNum	District Number that student resides in, as opposed to school district student is attending	N	4	From MDE District Codes Table <i>See Attachments Appendix D.4</i>
SchoolName	The name of the school	N	35 (max)	
SchoolNum	The number of the school in which the student attends school	N	3	From MDE School Codes Table <i>See Attachments Appendix D.11</i>
Semester1Grade	Grade of first semester, or average of multi-term course	A	3 (max)	
Semester2Grade	Grade of second semester, or average of multi-term course	A	3 (max)	
SessionEnd	Ending date of school year	D	10	

Data Element Name	Description	Data Type	Size (bytes)	Value/Format
SessionLength	Length of grade (school year) in days	N	3 (max)	
SessionStart	Starting date of school year	D	10	
SingleParentInd	Single parent indicator for vocational student	A	1	'Y' – YES 'N' – NO
SpecEdInd	Special Education Student Indicator	A	1	'Y' – YES 'N' – NO
SpecialCodes	Special Codes for elementary grades	A	30 (max)	
SpecialPopInd	Indicates if a student is receiving services from Special population personnel	A	1	'Y' – YES 'N' – NO
SSN	Social security number for student	A	9	Numeric (no dashes)
SummerSchDate	Date of entry to summer school date	D	10	See Below
SummerSchName	Name of Summer School	A	35 (max)	
TeacherFirstName	First name of teacher	A	20 (max)	
TeacherLastName	Last name of teacher	A	20 (max)	
TeacherSSN	SSN of teacher	A	9	
TechPrepProgInd	Technology Preparation Program indicator	A	1	'Y' – YES 'N' – NO
TermSemesterCode	Term or semester Code	A	2	From Term, Semester List <i>See Appendix C</i>
TermSemGrade	Term or semester grade	A	3 (max)	
TestDate	Date of test	D	10	See Below
TestDescription	Description of test including the name of the test, the test score and other student test data	A	255 (max)	
TitleIEligInd	Title I Eligibility indicator	A	1	'Y' – YES 'N' – NO
TitleIFosterInd	Title I Foster Care indicator	A	1	'Y' – YES 'N' – NO
TitleIHomelessInd	Title I student: homeless indicator	A	1	'Y' – YES 'N' – NO
TitleILangInd	Title I Language indicator	A	1	'Y' – YES 'N' – NO
TitleIMathInd	Title I Math indicator	A	1	'Y' – YES 'N' – NO
TitleINeglectInd	Title I student: neglected or delinquent indicator	A	1	'Y' – YES 'N' – NO
TitleIReadingInd	Title I Reading indicator	A	1	'Y' – YES 'N' – NO
TitleIScienceInd	Title I Science indicator	A	1	'Y' – YES 'N' – NO

Data Element Name	Description	Data Type	Size (bytes)	Value/Format
TitleISocialInd	Title I Social Studies indicator	A	1	'Y' – YES 'N' – NO
TitleISupportInd	Title I Support Services indicator	A	1	'Y' – YES 'N' – NO
TrackId	Tracking ID for transaction	A	25	See below
TransactionV	Version of transaction	A	5 (max)	<i>Major.Minor</i> (e.g., 1.0)
TransportCode	Valid transportation code	A	2	'A1' – Living in district and transported by this district 'A2' – Living out of district and transported by this district 'A3' – Living out of district and transported by resident district 'A4' – not transported From MDE Transportation Type Codes Table See Attachments Appendix D.12
TransportGrade	Grade of student being transported	N	2	From MDE Grade Level Codes Table See Attachments Appendix D.8
TransStatus	Transaction Status	A	7	'SUCCESS' – transaction accepted with no errors, 'WARNING' – transaction accepted, but with warnings 'FAILURE' – transaction rejected
UngradedInd	Vocational student ungraded indicator	A	1	'Y' – YES 'N' – NO
UpdateInd	Transaction update indicator	A	1	'Y' – YES 'N' – NO
Uniqueld	Unique student identifier that is assigned by the School Packages	A	Vary by Package 30 (max)	
VocationalInd	Vocational student indicator	A	1	'Y' – YES 'N' – NO

Data Element Name	Description	Data Type	Size (bytes)	Value/Format
VocProgLevel	Vocational program student level	N	1	Currently '1' or '2' for secondary students
VocStatusInd	Vocation course status	A	1	'P'- passed 'F' – Failed 'W' – withdraw
WeaponType	Weapon Type of student incident related to disciplinary action	A	4 (max)	From Weapon Type List See Appendix C
WithdrawalGrade	Grade student was in when they withdrew	A	2	From MDE Grade Level Codes Table See Attachments Appendix D.9
WithdrawCode	Valid withdrawal code	A	2 (max)	From MDE Entry & Withdrawal Codes Table See Attachments Appendix D.6
WithdrawDate	Effective date of withdrawal	D	10	See Below

Table A-1 Data Element Definitions

A.1 Date Formats

A.1.1 Date Format

MM/DD/YYYY

or

MM-DD-YYYY

A.1.2 Date Time Group Format

MM/DD/YYYY HH:MM:SS XXX

where XXX is the time zone (e.g., EST).

A.2 Tracking ID Format

DDDD-SSS-MM/DD/YYYY-NNNNN

where:

- DDDD is the Originating District Number
- SSS is the Originating School Number
- MM/DD/YYYY is the date of the transaction (set)
- NNNNN is a 5 digit sequence number

B. Transaction Definitions Appendix

An XML transaction contains one or more tagged data elements, organized in a hierarchical manner. Optional data that is not provided is simply omitted.

Tagged elements are comprised of a start tag, data and/or other tagged elements, and an end tag.

An XML start tag has the following format:

```
<tag>
```

An XML end tag has the following format:

```
</tag>
```

Each XML transaction must begin with the XML Declaration, which controls how the parser will interpret the document. This line tells the XML processor the XML version, the basic scheme for encoding, and that the XML file is not a standalone file because of an external Document Type Definition (DTD). An example is provided below:

```
<?xml version="1.0" encoding="UTF-8" standalone="no"?>
```

The next line is the Document Type Declaration, which includes the DTD. XML provides a mechanism to reference an external DTD file using the following syntax:

```
<!DOCTYPE SAP_TRANS SYSTEM "INITIALLOAD.DTD">
```

Each Transaction Set envelope will contain a different DTD depending on which file is being transmitted. Listed below are the DTD filenames and which Transaction Set it is associated with.

Note: These filenames are case sensitive and must be in uppercase.

INITIALLOAD.DTD – Initial Load Transaction
TR_ASSIGN.DTD – MSIS ID File Transaction
TR_DAYS.DTD – Monthly – Days Taught Data Transaction
TR_STUDENT.DTD – Monthly – Student Data Transaction
TR_CUME.DTD – Monthly – Student Historical Record Transaction
TR_DAILY.DTD – Daily – Student Transaction
TR_SUMMER.DTD – Summer School – Student Data Transaction
TR_PERSONNEL.DTD – Personnel Data Transaction

The Transaction set envelope and the individual MSIS 1.0 Transaction XML formats are defined in the subsections that follow. The definition tables include the following columns:

- Tag – indicates the tag name for the data element. This name replaces tag in the start and end tag definitions, above.
- Parent Tag – indicates which tag this data element is a child of. This defines the hierarchical relationships. Parent tags do not have data values associated with them. They are used to put tagged child data in context.
- Data Element Name – The name of the data element defined in Appendix A.
- Description – a description of the data element, in the defining context.
- M/O – indicates if the data element is mandatory (M), optional (O), or specified in a numbered note (*number) at the end of the table. When a parent tag is optional, the

mandatory/optional state of the child tag elements applies when the data segment (parent and children) is included. **Optional tags that do not have data should NOT be included in the XML file. If this occurs, an error will be generated stating the data is MISSING.**

An example is provided for each transaction after its definition table. Line breaks and indentations are used in the examples to improve readability and illustrate hierarchy, but neither are required.

B.1 Transaction Set Envelope Definition – Version 1.0

Tag	Parent Tag	Data Element Name	Description
SAP_TRANS	N/A	N/A	School Administration Package transaction set parent tag
VERSION	SAP_TRANS	TransactionV	Version of this envelope
DTG	SAP_TRANS	DateTimeGroup	Date and Time this transaction was created
DISTRICT	SAP_TRANS	DistrictNum	Originator District Number
SCHOOL	SAP_TRANS	SchoolNum	Originator School Number
PERIOD	SAP_TRANS	RepPeriod	Current Reporting Period
<i>Various</i>	SAP_TRANS	<i>See individual transaction formats</i>	One or more MSIS School Administration Package interface Transactions

Table B-1. Transaction Set Envelope Definition

The Transaction Set Envelope will preface each of the following transactions: Initial Load, Monthly – DaysTaught Data, Monthly – Student Data, Monthly – Student Historical Record, Daily – Student Data and MSIS Transaction Result. The following is an example of an MSIS School Administration Package interface transaction set envelope:

Note: The actual MSIS DTD filename must be used in order for the Transaction to run successfully. Please refer to the Transaction Definitions Appendix B.

```
<?xml version="1.0" encoding="UTF-8" standalone="no"?>
<!DOCTYPE SAP_TRANS SYSTEM "xxxxxxxxx.DTD">
<SAP_TRANS>
  <VERSION>1.0</VERSION>
  <DTG>06/19/2022 13:00:05 EST</DTG>
  <DISTRICT>0013</DISTRICT>
  <SCHOOL>002</SCHOOL>
  <PERIOD>01</PERIOD>
  one or more transactions
</SAP_TRANS>
```

B.2 Initial Load Transaction Definition – Version 1.0

The Initial Load of student data transaction is used by the School Administration to transmit student data in order to set up the base student record in MSIS. This transmission will assign an MSIS ID to each student in each school or district, so that a student’s instructional growth can be tracked throughout the state of Mississippi. *This transmission will occur only once, and will not be repeated.*

Tag	Parent Tag	Data Element Name	Description	M/O
TR_LOAD	N/A	N/A	Student Data Transaction parent Tag	M
T_VERSION	TR_LOAD	TransactionV	Version of this transaction	M
TRACK_ID	TR_LOAD	TrackId	Tracking ID for this transaction	M
STUDENT	TR_LOAD	N/A	Student parent tag. Include one STUDENT tag for each student.	M
UID	STUDENT	Uniqueld	Student ID number used by the school packages to identify a student.	M
FNAME	STUDENT	LegalFirstName	Student first name	M
MNAME	STUDENT	MiddleName	Student middle name	O
LNAME	STUDENT	LegalLastName	Student last name	M
SSN	STUDENT	SSN	Student SSN. This data should be provided if it is available for the student	O
DOB	STUDENT	BirthDate	Student date of birth	M

Table B-2. Initial Load Transaction Definition – Version 1.0

The following is an example of the Initial Load Transaction Definition – Version 1.0:

```
<TR_LOAD>

    <DOB>01/01/2022</DOB>
  </STUDENT>
</TR_LOAD>
```

B.3 MSIS ID File Transaction Definition – Version 1.0

The MSIS ID file transaction will be used by the School Administration packages to load the newly assigned MSIS ID for each student in their school or district. Computer Sciences Corporation will produce a file for each school or district containing the newly assigned MSIS ID number and the unique student identifier for each student.

Tag	Parent Tag	Data Element Name	Description	M/O
TR_ASSIGN_ID	N/A	N/A	Student Data Transaction parent Tag	M
T_VERSION	TR_ASSIGN_ID	TransactionV	Version of this transaction	M
TRACK_ID	TR_ASSIGN_ID	TrackId	Tracking ID for this transaction	M
STUDENT	TR_ASSIGN_ID	N/A	Student parent tag. Include one STUDENT tag for each student.	M
UID	STUDENT	UniqueStudentId	Student ID number used by the school packages to identify a student. This field will be returned as alphanumeric.	M
MSISID	STUDENT	MSISStudent Id	Mississippi Unique Identifier for each student	M

Table B-3. MSIS ID File Transaction Definition – Version 1.0

The following is an example of the MSIS ID File Transaction Definition – Version 1.0:

```
<TR_ASSIGN_ID>
  <T_VERSION>1.0</T_VERSION>

    <MSISID>000111222</MSISID>
  </STUDENT>
</TR_ASSIGN_ID>
```

B.4 Monthly - DaysTaught Data Transaction Definition – Version 1.0

The Monthly - DaysTaught Data transaction is used by School Administration Packages to transmit the number of days taught per grade for the current reporting period to MSIS.

Tag	Parent Tag	Data Element Name	Description	M/O
TR_DAYS	N/A	N/A	DaysTaught Data Transaction parent Tag	M
T_VERSION	TR_DAYS	TransactionV	Version of this transaction	M
TRACK_ID	TR_DAYS	TrackId	Tracking ID for this transaction	M
GRADEDAYS	TR_DAYS	N/A	Grade Days Parent Tag One for Each valid grade for each school.	M
GRADE	GRADEDAYS	GradeLevel	Grade for which Number of Days taught applies	M
DAYSTAUGHT	GRADEDAYS	DaysTaughtGrade	The Number of Days taught during the reporting period for each grade.	M

Table B-4. Monthly - DaysTaught Data Transaction Definition

The following is an example of a Monthly - DaysTaught Data Transaction Definition:

```
<TR_DAYS>
  <T_VERSION>1.0</T_VERSION>
  <TRACK_ID>0124-004-04/30/2012-1</TRACK_ID>

B.8 MSIS Transaction Result Definition – Version 1.0

Every transaction that is processed by MSIS is responded to with an MSIS Transaction Result. The result provides the status of a transaction. If the status is not SUCCESS, the original transaction is returned, along with an identification of the error.

Tag	Parent Tag	Data Element Name	Description	M/O
TRANS_RESULT	N/A	N/A	Transaction Result parent tag	M
T_VERSION	TRANS_RESULT	TransactionV	Version of the Transaction Result definition	M
TRACK_ID	TRANS_RESULT	TrackId	Tracking ID from the transaction being reported on	M
T_TRANS_STATUS	TRANS_RESULT	TransStatus	Overall Status of the transaction referred to by the tracking ID. This should be the most severe status code of the individual data elements	M
ENTRY_ERROR	TRANS_RESULT	N/A	Entry Error parent tag. Supply an ENTRY_ERROR set of data for each tagged data element that had a Warning or Failure status during transaction processing. Not included of overall transaction status is Success.	O
E_TRANS_STATUS	ENTRY_ERROR	TransStatus	“WARNING” or “FAILURE”, for each data element being reported on	M ¹
LINENUM	ENTRY_ERROR	LineNum	Line number where the error occurred	M ¹
MSISID	ENTRY_ERROR	MSISStudentId	MSIS Student ID	M ^{1,2}
UID	ENTRY_ERROR	UniquieID	Student ID number used by the school packages to identify a student	M ^{1,2}
ERROR_HIER	ENTRY_ERROR	ErrorHierarchy	Tag hierarchy where the error occurred	M ¹
ERROR_VAULE	ENTRY_ERROR	ErrorValue	Original transaction data element value	M ¹
ERROR_TYPE	ENTRY_ERROR	ErrorType	“MISSING”, “INVALID”, or “NOT_ALLOWED” error status code	M ¹

Notes:

1. Mandatory if TransStatus is “FAILURE” or “WARNING”; Omitted if Overall TransStatus is “SUCCESS”
2. Included in Monthly Student Transactions, Daily Student Transactions, Cumulative Student History, and Summer Student Transactions

B.9 Summer School – Student Transaction Definition – Version 1.0

The Summer School - Student Data transaction is used by School Administration Packages to transmit student summer school data to MSIS for use in graduation, promotion, and student transcript reports.

Tag	Parent Tag	Data Element Name	Description	M/O
TR_SUMMER	N/A	N/A	Student Data Transaction parent Tag	M
T_VERSION	TR_SUMMER	TransactionV	Version of this transaction	M
TRACK_ID	TR_SUMMER	TrackId	Tracking ID for this transaction	M
STUDENT	TR_SUMMER	N/A	Student parent tag	M
MSISID	STUDENT	MSISStudentID	MSIS Student ID	M
FNAME	STUDENT	LegalFirstName	Student first name	M
MNAME	STUDENT	MiddleName	Student middle name	O
LNAME	STUDENT	LegalLastName	Student last name	M
SSN	STUDENT	SSN	Student SSN. This data should be provided if it is available for the student	O
DOB	STUDENT	BirthDate	Student date of birth	M
PROMOTE	STUDENT	N/A	Promote information parent tag. Include one PROMOTE set of data for each time promoted within a school year.	O
PROMOTION	PROMOTE	PromoteInd	Indicates whether student is being promoted to next grade level	M ¹
P_DATE	PROMOTE	PromoteDate	Date Student was promoted	M ¹
GRADCODE	PROMOTE	GraduationType	Type of graduation. Should be provided if the student is graduating.	O
GRADENDR1	GRADCODE	Diploma Endorsement	Must be valid Diploma Endorsement	O
GRADENDR2	GRADCODE	Diploma Endorsement	Must be valid Diploma Endorsement	O
SCHEDULE	STUDENT	N/A	Schedule parent tag. Include one SCHEDULE set of data.	M
COURSE	SCHEDULE	N/A	Course parent tag. Include one COURSE set of data for each course taken.	M
COURSENUM	COURSE	CourseCode	Valid Course Code	M
LOCALNUM	COURSE	LocalCode	Local course code	M ²
LOCALNAME	COURSE	LocalName	Description of local course	M ²
FINALGRADE	COURSE	FinalGrade	The average for the course	M
CREDITS	CLASS	Credits	Credits for the term or semester of course	M
CARNEGIE	CLASS	CarnegieUnits	Carnegie units for the term or semester of course	M
CLASS	COURSE	N/A	Class parent tag. Include one CLASS set of data for	M

Tag	Parent Tag	Data Element Name	Description	M/O
			each class taken.	
TERMSEMCODE	CLASS	CourseTermSem	The Term or semester in which a course is being taken.	M
C_GRADE	CLASS	TermSemGrade	Grade of term or semester of course	M

Notes:

1. If the parent tag, which is optional, is included, then these fields are mandatory.
2. Only include for local courses that are mapped to generic state-level course code. **DO NOT SEND LOCAL COURSE CODES** unless the course in question has been mapped to a generic State Course Code. If a valid non-generic State Course Code exists, it **MUST** be used by itself.
