Synthesis of Information on Evidence-Based Practices for School Improvement: 20 Studies and Tools Focused on Evidence-Based Practices in School Improvement

This synthesis of studies and tools was prepared by AEM Corporation under contract ED-OOS-12-A-0019(0021) to the U.S. Department of Education (Department), Office of State Support, in the Office of Elementary and Secondary Education. This synthesis does not necessarily reflect the views or policies of the Department. The Department has not independently verified the content of this synthesis and does not guarantee accuracy or completeness. These materials may contain the views and recommendations of various subject matter experts as well as hyperlinked links, contact addresses, and websites to information created and maintained by other public and private organizations. The inclusion of the information in this synthesis is not intended to reflect a determination by the Department that any activity, product, program, intervention, model, or service mentioned may be supported with Federal funds. The Department has not determined that the practices in this synthesis are effective and does not endorse or recommend any organization, product, or program mentioned in these resources or any views expressed in these resources; the practices described herein are provided merely for informational purposes.

Rubric for evaluating reading/language arts instructional materials for kindergarten to grade 5

Barbara R. Foorman
Kevin G. Smith
Marcia L. Kosanovich
Florida State University

Overview

This rubric is a tool for evaluating reading/language arts instructional materials for grades K-5. Based on rigorous research, the rubric can be used by state-, district-, and school-level practitioners and by university faculty who review instructional materials. The rubric is organized by content area for grades K-2 and for grades 3-5. Each content area (for example, writing) includes a list of criteria for evidence-based practice that the instructional materials are expected to include. Each criterion is aligned to recommendations from six What Works Clearinghouse practice guides, and a 1-5 scale is used to rate how well the criteria were met. Guidance for when and how to use the rubric—including facilitator responsibilities, professional learning for reviewers, and ways to use the ratings—is also provided.

Best Evidence Encyclopedia

Empowering Educators with Evidence on Proven Programs

- The Best Evidence Encyclopedia is a free web site created by the Johns Hopkins University School of Education's Center for Data-Driven Reform in Education (CDDRE) under funding from the Institute of Education Sciences, U.S. Department of Education.
 - It is intended to give educators and researchers fair and useful information about the strength of the evidence supporting a variety of programs available for students in grades K-12. Content areas include mathematics, reading, early childhood, school reform, and science.
 - The Best Evidence Encyclopedia provides summaries of scientific reviews produced by many authors and organizations, as well as links to the full texts of each review.
