Introduction

Mission Statement

The Mississippi Department of Education (MDE) is dedicated to student success, which includes improving student achievement and establishing communication skills within a technological environment. The *Mississippi Alternate Academic Achievement Standards (MS AAAS) for Life Skills Development I* provide a consistent, clear understanding of what students are expected to know and be able to do by the end of the course. The purpose of the *MS AAAS for Life Skills Development I* is to ensure that secondary students with the most significant cognitive disabilities are provided with individualized life skills instruction that is relevant to the real world, reflecting the knowledge and skills that students need to function in and succeed in settings beyond school.

Purpose

In an effort to closely align instruction for students with significant cognitive disabilities who are progressing toward postsecondary settings, the *MS AAAS for Life Skills Development I* are grouped into four domains: self-care and independent living, social and communication, self-determination, and transition planning and community participation. This document is designed to provide a resource for 9-12 special education teachers with a basis for curriculum development and instructional delivery.

The *Teacher Resource Guide for Life Skills Development I* contains prioritized content, which is presented as a matrix to show the continuum of the concept across complexity levels. The matrix shows varying access points to the prioritized content. A student's progression through content contained in the matrix is intended to be fluid. It is not the intent, nor should it be practice, for a student to be exposed to content in a straight vertical line through one of the columns. Every student, regardless of disability, comes to the learning environment with a different set of prior knowledge and experience. For this reason, a student may be able to access some content from the middle complexity level and access other concepts at the more complex level. Teachers should evaluate a student's ability in relation to the content and select the entry point based on that evaluation. Students should not be locked into receiving exposure to all content at the same entry point.

Support Documents and Resources

The MDE Office of Special Education aims to provide local districts, schools, and teachers documents to construct standards-based instruction and lessons, allowing them to customize content and delivery methods to fit each student's needs. The teacher resource guide includes suggested resources, instructional strategies, sample lessons, and activities. Additional sample activities and resources for selected standards may be added; this shall be a living document with ongoing updates based on educator feedback. The intent of these resources is to assist teachers in linking their instruction to the prioritized content. The teacher resource guide includes activity adaptations for students with a varying range of abilities within the classroom. The activities and adaptations provided are intended to serve as a model of how students may receive instruction in life skills. There are many ways in which skills and concepts can be incorporated based on student's individual learning styles and needs. Professional development efforts are aligned to the *MS AAAS for Life Skills Development I* and delivered in accord with teacher resources to help expand expertise in delivering student-centered lessons.

Structure of the Teacher Resource Guide for Life Skills Development I Document

Mississippi Alternate Academic Achievement content standard: The *MS AAAS for Life Skills Development I* is a general statement of what students with significant cognitive disabilities should know and be able to do because of instruction.

Performance Objectives: Statements that describe in precise, measurable terms what learners will be able to do at the end of an instructional sequence.

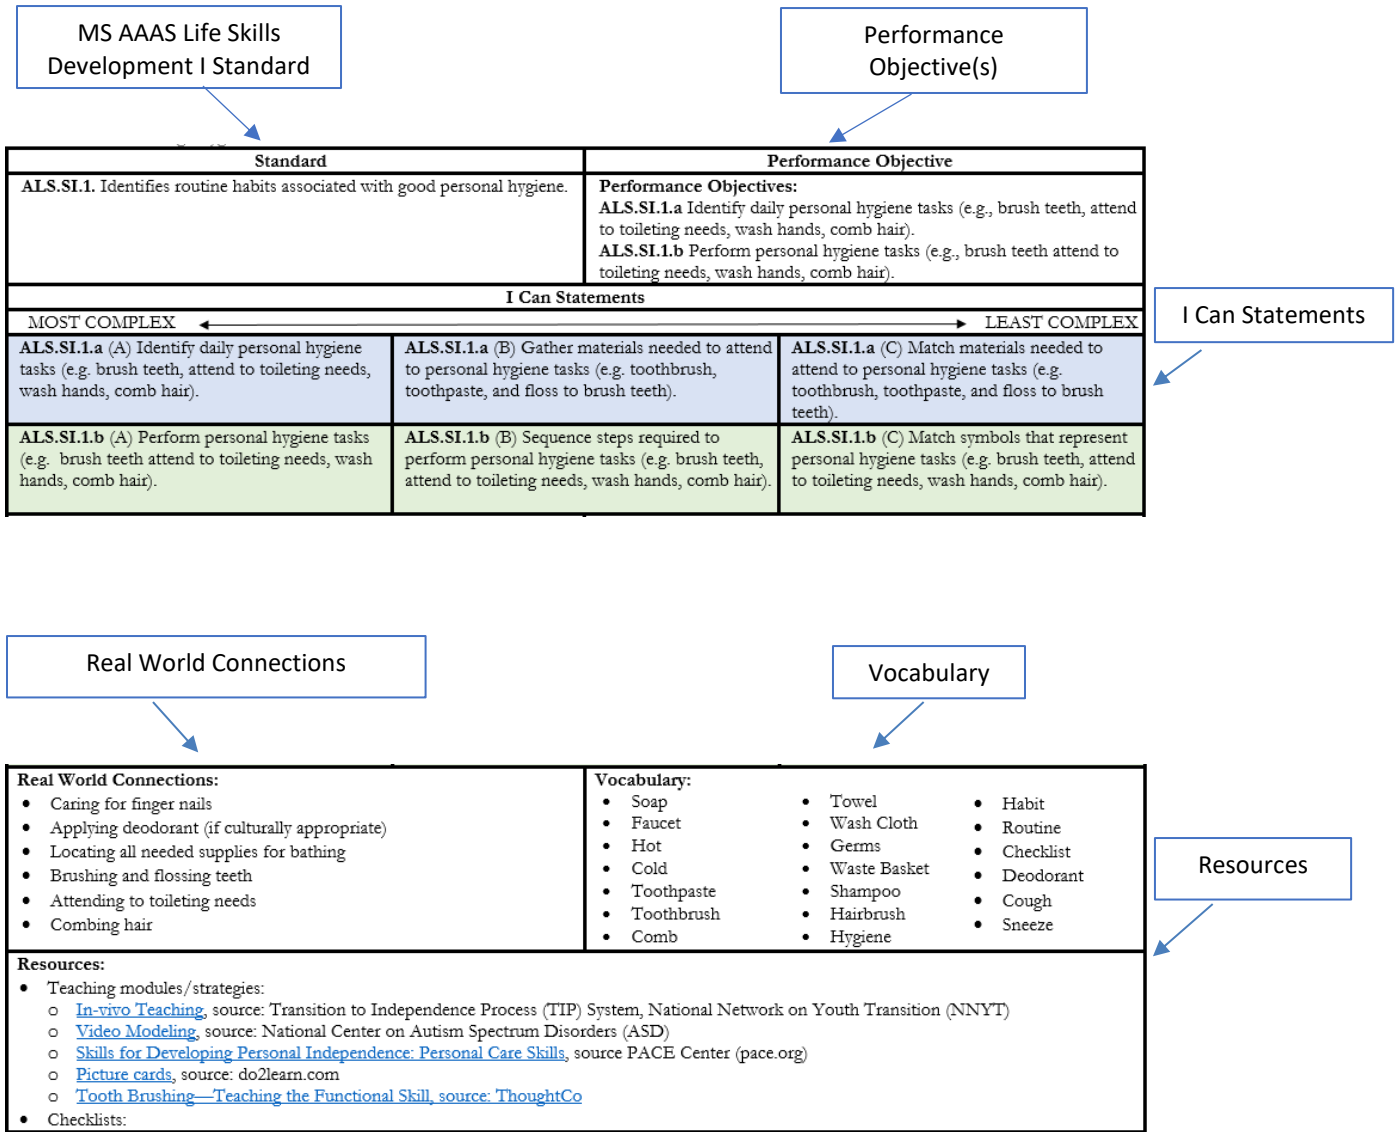

I Can Statement(s): Includes the Performance Objective(s) as the *Most Complex* and scaffolds the performance objectives two additional levels (B) and (C) to *Least Complex*. This matrix demonstrates the continuum of the concept across complexity levels. The purpose is to assist teachers in modifying to meet the unique diverse needs of learners with significant cognitive disabilities.

Real-World Connections: One way to facilitate learning that is meaningful to students and prepares them for their professional lives outside of school. When teachers move beyond textbook or curricular examples and connect content learned in the classroom to real people, places and events, students are able to see a greater relevance to their learning. Real-world connections are used to help students see that learning is not confined to the school, allow them to apply knowledge and skills in real world situations, and personalize learning to increase and sustain student engagement.

Vocabulary: Includes a list of difficult or unfamiliar words.

Resources: Includes suggested resources, instructional strategies, lessons, and activities. Additional sample activities and resources for selected standards may be added; this shall be a living document with ongoing updates based on educator feedback. The intent of these activities is to assist teachers in linking their instruction to the prioritized content.

Structure of the Teacher Resource Guide for Life Skills Development I Document (Graphic)

Levels of Support (LOS)

Students with significant cognitive disabilities require varying LOS to engage in academic content. The goal is to move the student along the continuum of assistance toward independence by decreasing the LOS provided and increasing student accuracy within the context of content to demonstrate progress. The following chart describes the continuum of LOS. Appropriate LOS are important to increase student engagement and student independence and to track student achievement and progress.

Level of Assistance	Definition	Example	Non-Example
Non-Engagement (N)	The student requires assistance from the teacher to initiate, engage, or perform; however, the student actively refuses or is unable to accept teacher assistance.	The student resists the teacher's physical assistance toward the correct answer.	The student does not look at the activity.
Physical Assistance (P)	The student requires physical contact from the teacher to initiate, engage, or perform.	The teacher physically moves the student's hand to the correct answer.	The teacher taps the correct answer and expects the student to touch where he/she tapped.
Gestural Assistance (G)	The student requires the teacher to point to the specific answer.	When presenting a choice of three pictures and asking the student which picture is a triangle, the teacher will point to or tap on the correct picture to prompt the student to indicate that picture.	The teacher moves the student's hand to gesture toward the right answer.
Verbal Assistance (V)	The student requires the teacher to verbally provide the correct answer to a specific item.	The teacher says, "Remember, the main character was George. Point to the picture of the main character."	The teacher says "Who is the main character?" without providing the information verbally.
Model Assistance (M)	The student requires the teacher to model a similar problem/opportunity and answer prior to performance.	The teacher models one-to-one correspondence using manipulatives and then asks the student to perform a similar item.	The teacher completes the exact same activity as the student is expected to perform.
Independent (I)	The student requires no assistance to initiate, engage, or perform. The student may still require other supports and accommodations to meaningfully engage in the content but does not require assistance to participate and respond.	The teacher asks the student, "Who is the main character of the book?" and the student meaningfully responds without any prompting or assistance.	The teacher asks the student, "Who is the main character?" and points to the picture of the main character.

Teacher Resource Guide for Life Skills Development I

COURSE: Life Skills Development I
 DOMAIN: Self Care/Independent Living
 CONCEPT: Grooming/Hygiene

Standard		Performance Objective	
ALS.SI.1. Identifies routine habits associated with good personal hygiene.		Performance Objectives: ALS.SI.1.a Identify daily personal hygiene tasks (e.g., brush teeth, attend to toileting needs, wash hands, comb hair). ALS.SI.1.b Perform personal hygiene tasks (e.g., brush teeth attend to toileting needs, wash hands, comb hair).	
I Can Statements			
MOST COMPLEX ←		→ LEAST COMPLEX	
ALS.SI.1.a (A) Identify daily personal hygiene tasks (e.g. brush teeth, attend to toileting needs, wash hands, comb hair).	ALS.SI.1.a (B) Gather materials needed to attend to personal hygiene tasks (e.g. toothbrush, toothpaste, and floss to brush teeth).	ALS.SI.1.a (C) Match materials needed to attend to personal hygiene tasks (e.g. toothbrush, toothpaste, and floss to brush teeth).	
ALS.SI.1.b (A) Perform personal hygiene tasks (e.g. brush teeth attend to toileting needs, wash hands, comb hair).	ALS.SI.1.b (B) Sequence steps required to perform personal hygiene tasks (e.g. brush teeth, attend to toileting needs, wash hands, comb hair).	ALS.SI.1.b (C) Match symbols that represent personal hygiene tasks (e.g. brush teeth, attend to toileting needs, wash hands, comb hair).	
Real World Connections: <ul style="list-style-type: none"> • Caring for finger nails • Applying deodorant (if culturally appropriate) • Locating all needed supplies for bathing • Brushing and flossing teeth • Attending to toileting needs • Combing hair 		Vocabulary: <ul style="list-style-type: none"> • Soap • Faucet • Hot • Cold • Toothpaste • Toothbrush • Comb • Towel • Wash Cloth • Germs • Waste Basket • Shampoo • Hairbrush • Hygiene • Habit • Routine • Checklist • Deodorant • Cough • Sneeze
