

Special Education Performance Determination Report- 2022

2220 - GRENADA SCHOOL DIST

Overview

The Mississippi Department of Education (MDE) is issuing this **Special Education Performance Determination Report** to inform all stakeholders on how well the district is supporting students in special education. The data for this report is based on results and compliance data compiled annually in the Annual Performance Report of the State Performance Plan under the Individuals with Disabilities Education Act (*IDEA*). The State Performance Plan is comprised of 14 items that indicate how well the State is serving students with disabilities. MDE submits an Annual Performance Report on these indicators to the U.S. Department of Education and we publish how well each district has performed on the indicators. A target score for each indicator was set by the MDE with input from the Special Education Advisory Panel when the State Performance Plan was written.

In creating the Special Education Performance Determination Report, MDE considered the totality of the information we have about a district to issue a determination of how well the district is performing on educating students with disabilities. Data considered included the participation and performance of students with disabilities on the administration of the Mississippi Assessment Program; exiting data on students with disabilities who dropped out of school and those who graduated with a regular high school diploma; how much time students with disabilities are educated with their non-disabled peers; and other issues related to district compliance with the *IDEA*. This report is based on data from the 2021-2022 school year.

Data points for the district are separated into two categories: compliance and results. The **compliance data points** are based on how well districts are following the rules of *IDEA*. Districts will get an overall score for their compliance data. The **results data points** are based on key outcomes for educating students with disabilities. Districts will get an overall score for their results indicators. The district's Special Education Performance Determination is based on an average score of the results and compliance scores. Items will be scored using the following matrix:

Scoring Matrix

Results Indicator Points		Compliance Indicator Points	
2	State Target Met or Exceeded	2	State Target Met or Exceeded
1	At State Average or Better, But Not at State Target	0	State Target Not Met
0	Below State Average		

Determination Levels:

Each district will be determined to be in one of the four levels, prescribed by the U.S. Office of Special Education Programs (OSEP), based on its score. The State Lead for each district will provide differentiated supports to each district based on the individualized needs of each district and its determination.

Determination Level	2022 Report	
Meets Expectations	Score	<i>75% and Above</i>
Needs Assistance	Score	<i>At least 65% but less than 75%</i>
Needs Intervention	Score	<i>At least 50% but less than 65%</i>
Needs Substantial Intervention	Score	<i>Less than 50%</i>

Indicator 3 of the SPP/APR focuses on student’s participation and performance on Statewide assessments of the Mississippi College and Career Readiness Standards and the DLM Essential Elements for English Language Arts and Mathematics which are Mississippi’s alternate achievement standards for students with significant cognitive disabilities. The State reports a single performance score for ELA and a single performance score for math. This report disaggregates that performance score to the individual grade level and a score is given based on the State target set for the content area in the SPP/APR.
