Chronic Absenteeism Data by Schools	19

September 26, 2019

Greetings:

On behalf of the Mississippi Department of Education (MDE), I want to thank you for your interest in regular school attendance and its impact on student outcomes. It is our hope that this report will highlight the importance in the educational progress of students – from reading proficiency in elementary grades to graduating on time from high school.

The Mississippi Department of Education produces an annual school- and district-level report of chronic absenteeism. As highlighted in this report, the chronic absenteeism rate for Mississippi dropped from 16.86% in the 2017-18 school year to 13.05% in 2018-19 school year. This is exciting news, and is corresponds with Mississippi's climbing graduation rate, which is at an all-time high of 84% based on the most recent available data.

The MDE is committed to supporting schools and communities as they work to continue to reduce student absenteeism. Through partnerships such as the Campaign for Grade Level Reading, initiatives such as Strive for Less Than Five, and ongoing engagement between schools and parents, we are optimistic that we will see further improvement in student attendance and academic outcomes.

Thank you for encouraging the children in your family and community to be present for school each day!

Sincerely,

Nathan Oakley, Ph.D.; Chief Academic Officer
Mississippi Department of Education

INTRODUCTION

Chronic absenteeism is defined as missing 10% (18 days) of the school year for any reason. Chronic absence differs from Average Daily Attendance (ADA), which is the average number of enrolled students who attend school each day. A school's ADA often mask issues surrounding the number of students who are chronically absent. A school can potentially have an ADA of 95% or higher while having a chronic absence rate greater than 10%.

Nationally, over six million students were chronically absent from school during the 2013–2014 school year, representing 14% of all students. In line with the 'absent for 10% or more days' guideline described above, chronically absent means absent for 18 or more school days. Rates are higher for Black (17%) and Hispanic (14%) than for White (12%) and Asian (7%) students.¹ Native American (22%) and Pacific Islander (21%) students have the highest rates of chronic absenteeism. However, these students represent (combined) 6% of the total elementary and secondary school enrollment.² English language learners (ELL) are less likely (11%) than non-ELs (14%) to be chronically absent, while students with disabilities (SWD) are 50% more likely than their non-disabled peers to be chronically absent.³ Although absentee rates vary across states by district, school, and grade level, there is a general pattern of chronic absenteeism across the PK–12th grade continuum. The highest rates of student absenteeism occur at the pre-school/kindergarten level and in high school.⁴ As noted previously, absenteeism at the pre-kindergarten and kindergarten levels has negative consequences as children move up the grade ladder. Specifically, research evidence shows that kindergarteners who miss 10% or more school days have lower academic performance when they reach first grade.⁵ At this level, high absenteeism is typically attributed to student health problems (mostly asthma), challenges faced by caregivers that prevent them from getting children to school (poverty, adult mental illness), transportation-related difficulties, or lack of parent awareness about negative consequences of pre-school absences and school readiness.⁶ Health problems and transportation challenges account for two-thirds of absences at the pre-school level.⁷ At the upper elementary level (4–6 grades), chronic absenteeism declines, but then increases as students move into the middle and high school grades. Several factors contribute to chronic absenteeism at these levels, among them fear of violence on the way to school, alienation from school, bullying, need to care for younger siblings, and strict discipline policies that push students out of school.⁸ At all levels of

² Although Native American students are a small percentage of the overall national enrollment, they represent a significant proportion of school enrollment in the Northwest, Midwest, Southwest, and Alaska. Consequently, Native American students' chronic absenteeism is more impactful in schools in those states.

schooling, students who are homeless or move often also exhibit a pattern of high absenteeism.⁹ Schools with a large proportion of students in poverty, regardless of region of the country (or state), are more likely to have high absentee rates. A recent state-by-state analysis shows that schools with poverty levels of 50% and above had the highest percentage of “extreme and high chronic absences” rates compared with schools in which the poverty level was below 50%.¹⁰

Researchers examined the effects of multiple interventions designed to produce positive outcomes such as increasing student attendance, reducing the dropout rate, and increasing high school graduation rates. Researchers found that, when the projected outcome is to decrease student absences, the interventions produce positive results. However, when the measures of success are long-term outcomes, such as increasing student graduation rates, reducing dropout rates, or college graduation, the evidence for success yields mixed results.¹¹ In addition, experts emphasize that punitive approaches such as fines, suspensions, or jail time for parents/guardians are not very effective.¹² Nevertheless, districts are addressing the issue of chronic absenteeism at multiple levels, in collaboration with community partners, and through a variety of targeted activities. Experts have noted that many of these activities lack rigorous evaluation to determine effectiveness.

Mississippi’s chronic absenteeism rate decreased to its lowest rate since the Mississippi Department of Education (MDE) started reporting the rates. Kindergarten rate is the highest among the elementary school grades at 13.29 percent, then rates decrease steadily throughout grades 1st through 5th. The rates increase steadily throughout middle and high school. The rate peaks in grade 12 at 26.20%, which is a remarkable decrease from the 2017-2018 chronic absenteeism rate of 34.52%. In Mississippi, during the 2018-2019 school year, 63,226 students were chronically absent which is a decrease of 19,746 students from the 2017-2018 school year.

The MDE launched a statewide attendance awareness campaign in September of 2018 to encourage regular school attendance. The **Strive for Less than Five** campaign challenges students and school districts to strive to reduce individual absences to no more than five absences over the course of the entire school year. Mississippi’s campaign is part of a national movement to reduce chronic absenteeism. Students who miss an average of two (2) school days per month or eighteen (18) days a year due to excused absences, unexcused absences, or suspensions are considered chronically absent.

DEFINING CHRONIC ABSENTEEISM

Chronic absenteeism is typically defined as missing 10% or more of a school year (approximately 18 days a year), or just two days every month.

**2 Absences Per Month
x 9 Months of School
= Less Likely to Graduate
from High School**

CALCULATIONS OF CHRONIC ABSENTEEISM

for Federal Submission

Students enrolled in more than one school will be included in the report.

Any student enrolled in a school for at least 10 days must be included in the calculation.

Chronic absenteeism includes any student absent 10% or more of the time that he/she was enrolled in any school.

Any student who misses 50% or more of a school day is considered absent.

State Chronic Absenteeism Rates 2016-2019

The chart below represents state chronic absenteeism rates for school years 2016-2019. The current rate of 13.05% is the lowest rate reported since the MDE has been calculating and reporting chronic absenteeism rates.

STATE CHRONIC ABSENTEESIM RATES

Although the state experienced an increase in chronic absenteeism rates in all grades for the 2017-2018 school year, the charts below depict a decrease in chronic absenteeism rates in all grades for the 2018-2019 school year. During the 2017-2018 school year, twelfth grade had the highest increase and ironically have the largest decrease of 8.32% in chronic absenteeism for the 2018-2019 school year.

CHRONIC ABSENTEEISM RATES BY GRADE

The chart below illustrates the ten (10) districts with the highest chronic absenteeism rates for the 2018-2019 school year. The school districts identified in **ORANGE** and **RED** depict the school districts with the highest chronic absenteeism rates for two and three consecutive years, respectively.

HIGHEST CHRONIC ABSENTEEISM RATES

SCHOOL DISTRICTS

2018-2019

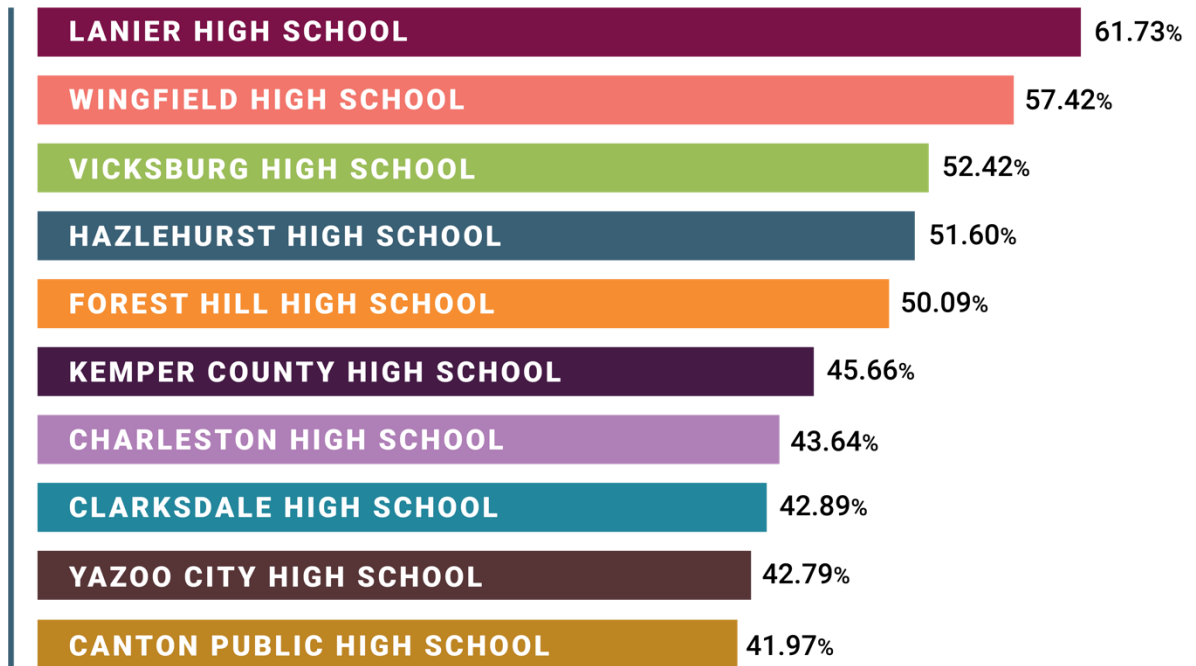

The chart below illustrates the ten (10) schools with the highest chronic absenteeism rates for the 2018-2019 school year.

HIGHEST CHRONIC ABSENTEEISM RATES

INDIVIDUAL SCHOOLS

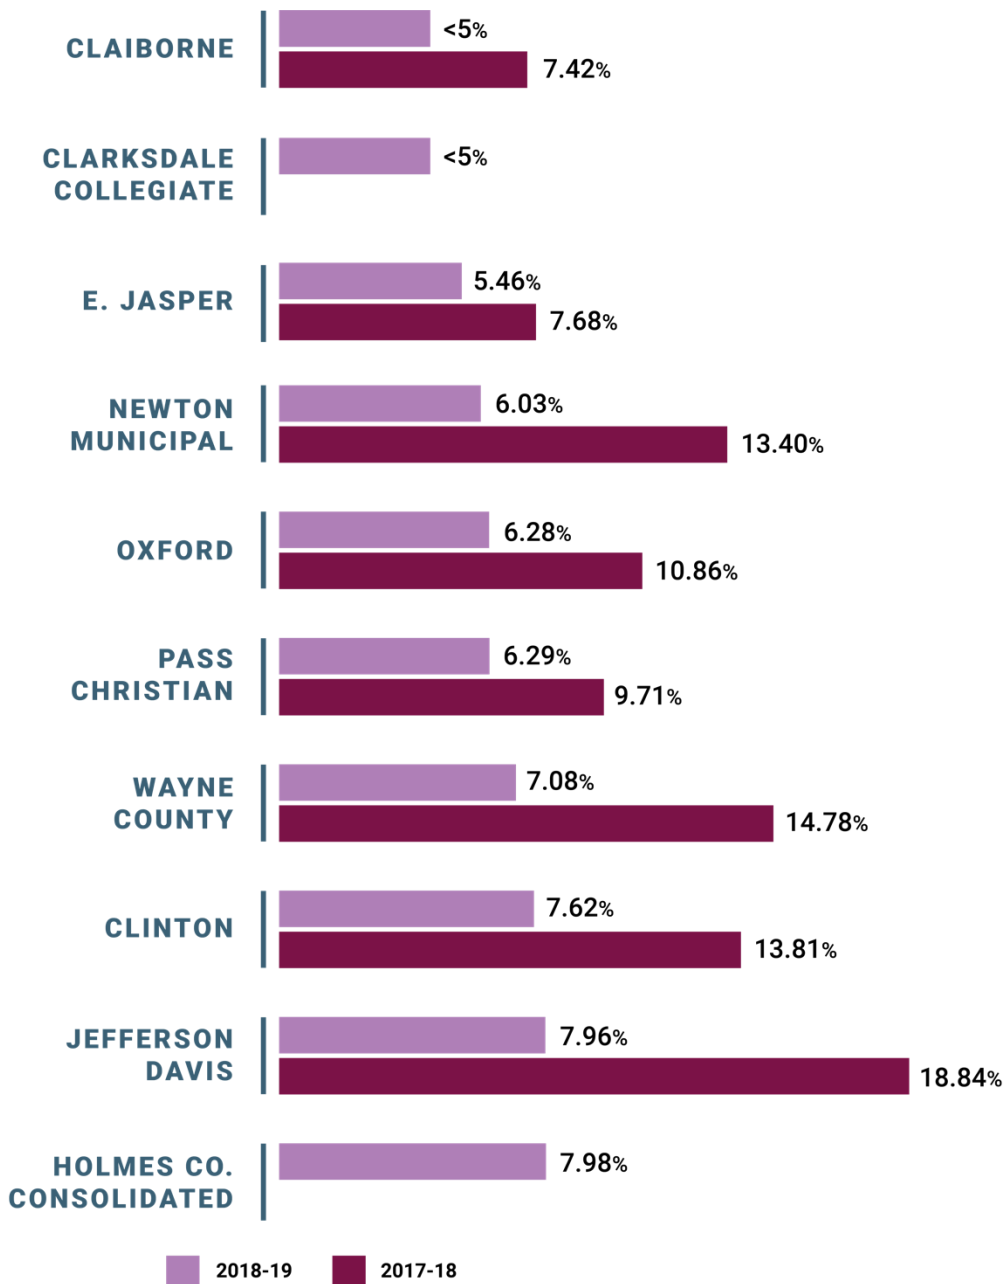

2018-2019

The chart below represents school districts with the lowest rates for the 2018-2019 school year. The 2017-2018 rates have been included for statistical purposes. Holmes County Consolidated School District and Coahoma Collegiate are newly established entities and the information is reported accordingly.

LOWEST CHRONIC ABSENTEEISM RATES

SCHOOL DISTRICTS

NOTE: Clarksdale Collegiate and Holmes County Consolidated are newly established school districts in 2018-2019.
