# Monitoring Actions for Implementation

The School Leadership Team should continuously use data to reexamine actions for implementation and document progress of action steps. Impact on student learning should be measured using benchmark data to determine effectiveness of interventions and alignment of MAAP goals outlined in the school's plan. Continuous, on-going, touchpoints are embedded within this document to support the school's implementation of next steps. Schools participating in the Transformation Academy, should address Early Actions and document progress toward implementation.
