## Achievement Gap Methodology

Achievement gap analysis identifies any disparity in assessment proficiency between subgroups of Mississippi's student population. As part of the Mississippi Consolidated State Plan for the Every Student Succeeds Act (ESSA), Mississippi aims to eliminate, or close, the assessment proficiency gap between student subgroups by 2025.

Assessment proficiency is defined as scoring at Level 4 or higher on a 1 – 5 proficiency scale for the yearly subject area assessments, where

- Level 1 is minimal proficiency in subject area
- Level 2 is basic proficiency in subject area
- Level 3 is “passing” proficiency in subject area
- Level 4 is proficiency in subject area
- Level 5 is advanced proficiency in subject area

The current achievement gap analysis is based on the 2016 and 2017 student assessment data for English Language Arts and Mathematics. To remain consistent with methodology used by other states across the nation, the MDE Office of Student Assessment has modified the gap analysis of the 2016 and 2017 assessment data to include only the assessment information on the *first* attempt of the subject area exam for each student, each year. For 8<sup>th</sup> grade students double testing in 8<sup>th</sup> grade math and Algebra I, only the 8<sup>th</sup> grade math assessment information is used.

To calculate the gap, the percentage of students scoring at Level 4 or higher is calculated at the State and District level for each student subgroup. The categories of student subgroups include:

- Race
  - White (reference)
  - African-American
  - Hispanic
  - Asian
  - Multiracial
  - Native American/Pacific Islander
- Economic Status
  - Not Economically Disadvantaged (reference)
  - Economically Disadvantaged
- Disability Status
  - Students without Disabilities (reference)
  - Students with Disabilities
- English Language Status
  - Not Limited English Proficiency (reference)
  - Limited English Proficiency
- Gender
  - Male (reference)
  - Female

In each category of student subgroups a reference subgroup is determined, based either on it being the larger of the subgroups or because it has the fewest impediments to educational learning. Once the reference group is determined, the other subgroups in the category are compared to the reference group to determine the achievement gap:

Example:

% proficient in Math for White students = 52.7

% proficient in Math for Hispanic students = 40.0

Gap =  $40.0 - 52.7 = -12.7\%$

An Increase/Decrease in achievement gap was also calculated for each subgroup to gauge the progress toward closing the proficiency gap between 2016 and 2017. An increase indicates the achievement gap widened, while a decrease indicates the achievement gap closed.

Female	124,562	49,889	40.1%	7.2%	36.3%	7.5%	-0.3%

**Technical Notes:**

- Gap analysis identifies any disparity in assessment proficiency between student subgroups. For example, the gap (or difference) between the percentage of proficient African-American students and the percentage of proficient White students:
  - % Proficient White students (reference) = 51.3
  - % Proficient African-American students = 22.4
  - Gap:  $22.4 - 51.3 = -28.9\%$
- Grey shading indicates the reference subgroup
- A negative gap indicates lower performance in the comparison subgroup when compared to the reference subgroup. A positive gap indicates higher performance in the comparison subgroup when compared to the reference subgroup
- The Increase/Decrease in achievement gap indicates whether the gap widened (an increase) or closed (a decrease) between 2016 and 2017
