

Edpuzzle ▶ <https://edpuzzle.com/>

Edpuzzle is a web-based tool for editing online videos and adding interactive content. Make any video your lesson by adding questions, links, or formulas to check student comprehension and get students eager to engage in critical thinking.

CLASSROOM CONNECTIONS

[4Cs: Collaboration, Communication, Creativity, Critical Thinking]

Edpuzzle has a library of teacher-created content so you can share videos and get inspired by what other educators are doing in their own classrooms. Create lessons using YouTube videos or create your own video with Edpuzzle's screen recording tool.

Edpuzzle's real-time analytics give insight into your students' progress. Create a class, find a video, edit the video to meet your needs, and assign a video lesson to your students!

Critical Thinking Use Edpuzzle to promote critical thinking with the use of open-ended questions. Students are given an opportunity to formulate a response rather than just recall. Multiple choice questions, open-ended questions, and notes can all be added to a video!

TRY IT

Choose a video and edit as needed. Add a multiple-choice question, an open-ended question and a note. Assign to your class and watch your students engage in learning!
