Pear Deck ▶ www.peardeck.com

Pear Deck allows educators to quickly transform slide decks into engaging activities for students. With just a few clicks you can turn any slide into a custom question or activity for your students.

CLASSROOM CONNECTIONS
[4Cs: Collaboration, Communication, Creativity, Critical Thinking]

Pear Deck can be used during direct instruction or to provide engaging independent learning opportunities. The teacher dashboard can help educators see individual student responses and provide real-time feedback while students are working. Pear Deck provides "student takeaways" for individual students. You can use this or the reports from each session to collect data to drive instruction for future learning.

Communication Students share thoughts, questions, and ideas when responding to interactive questions within the slide deck.

Critical Thinking Strategic wording of questions and facilitating of classroom discussion from answers can encourage students to analyze, evaluate, and apply knowledge.

TRY IT

1. Create a Pear Deck to review classroom instructions using the engagement features to boost communication and critical thinking.
2. Create a Flashcard Factory activity to review key vocabulary for an upcoming lesson.
