OFFICE OF INSTRUCTIONAL ENHANCEMENT AND INTERNAL OPERATIONS  
Summary of State Board of Education Agenda Items  
Consent Agenda  
April 18-19, 2013

OFFICE OF CAREER AND TECHNICAL EDUCATION

C. Approval to begin the Administrative Procedures Act process: To revise the Mississippi Secondary Curriculum Frameworks in Career and Technical Education for (1) Construction: Carpentry Concentration, (2) Culinary Arts, and (3) Introduction to Agriscience  
(Has cleared the Administrative Procedures Act process with no public comments)

Executive Summary

The following secondary curriculum frameworks are recommended for approval:

*1. Construction Core
*2. Carpentry
3. Culinary Arts
4. Introduction to Agriscience

*The Construction: Carpentry Concentration curriculum framework will be revised to become separate frameworks named: (1) Construction Core; and (2) Carpentry.

All curricula frameworks are designed to provide local programs with an instructional foundation that can be used to develop localized instructional management plans and course syllabi. Additionally, the frameworks include the following elements for each revised secondary curricula:

- Program Description
- CIP Code and CIP Name
- Course Outline and Codes
- Curriculum Framework
  - Student Competencies
  - Suggested Student Objectives

Draft curricula for each program were revised and reviewed with input from local district personnel and business/industry collaborators. Approved secondary curricula will be disseminated for implementation in the Fall 2013.

NOTE: The Office of Career and Technical Education has provided printed, bound executive summaries of the curriculum frameworks. The detailed documents are available upon request.

Recommendation: Approval

Back-up material attached
The Research and Curriculum Unit (RCU), located in Starkville, MS, as part of Mississippi State University, was established to foster educational enhancements and innovations. In keeping with the land grant mission of Mississippi State University, the RCU is dedicated to improving the quality of life for Mississippians. The RCU enhances intellectual and professional development of Mississippi students and educators while applying knowledge and educational research to the lives of the people of the state. The RCU works within the contexts of curriculum development and revision, research, assessment, professional development, and industrial training.
The Mississippi Department of Education, Office of Career and Technical Education does not discriminate on the basis of race, color, religion, national origin, sex, age, or disability in the provision of educational programs and services or employment opportunities and benefits. The following office has been designated to handle inquiries and complaints regarding the non-discrimination policies of the Mississippi Department of Education: Director, Office of Human Resources, Mississippi Department of Education, 359 North West Street, Suite 203, Jackson, Mississippi 39201, (601) 359-3511.
Foreword

Secondary career-technical education programs in Mississippi are faced with many challenges resulting from sweeping educational reforms at the national and state levels. Schools and teachers are increasingly being held accountable for providing true learning activities to every student in the classroom. This accountability is measured through increased requirements for mastery and attainment of competency as documented through both formative and summative assessments.

The courses in this document reflect the statutory requirements as found in Section 37-3-49, Mississippi Code of 1972, as amended (Section 37-3-46). In addition, this curriculum reflects guidelines imposed by federal and state mandates (Laws, 1988, ch. 487, §14; Laws, 1991, ch. 423, §1; Laws, 1992, ch. 519, §4 eff. from and after July 1, 1992; Carl D. Perkins Vocational Education Act III, 1998; and No Child Left Behind Act of 2001).

Each secondary career-technical course consists of a series of instructional units which focus on a common theme. All units have been written using a common format which includes the following components:

- **Unit Number and Title**
- **Suggested Time on Task** - An estimated number of clock hours of instruction that should be required to teach the competencies and objectives of the unit. A minimum of 140 hours of instruction is required for each Carnegie unit credit. The curriculum framework should account for approximately 75-80 percent of the time in the course.
- **Competencies and Suggested Objectives**
  - A competency represents a general concept or performance that students are expected to master as a requirement for satisfactorily completing a unit. Students will be expected to receive instruction on all competencies.
  - The suggested objectives represent the enabling and supporting knowledge and performances that will indicate mastery of the competency at the course level.
- **Suggested Teaching Strategies** - This section of each unit indicates strategies that can be used to enable students to master each competency. Emphasis has been placed on strategies which reflect active learning methodologies. Teachers should feel free to modify or enhance these suggestions based on needs of their students and resources available in order to provide optimum learning experiences for their students.
- **Suggested Assessment Strategies** - This section indicates strategies that can be used to measure student mastery. Examples of suggested strategies could include rubrics, class participation, reflection, and journaling. Again, teachers should feel free to modify or enhance these suggested assessment strategies based on local needs and resources.
- **Integrated Academic Topics, Workplace Skills, Technology Standards, and Occupational Standards** - This section identifies related academic topics as required in the Subject Area Assessment Program (SATP) in Algebra I, Biology I, English II, and U. S. History from 1877, which are integrated into the content of the unit. It also identifies the 21st Century Skills, which were developed by the Partnership for 21st Century Skills, a group of business and education organizations concerned about the gap between the knowledge and skills learned in school and those needed in communities and the workplace. A portion of the 21st Century Skills addresses learning skills needed in the 21st century, including information and communication skills, thinking and problem-solving skills, and interpersonal and self-directional skills. The need for these types of skills have been recognized for some time and
the 21st Century Skills are adapted in part from the 1991 report from the U.S. Secretary of Labor’s Commission on Achieving Necessary Skills (SCANS). Another important aspect of learning and working in the 21st century involves technology skills, and the International Society for Technology in Education, developers of the National Education Technology Standards (NETS), were strategic partners in the Partnership for 21st Century Skills.

- **References** - A list of suggested references is provided for each unit. The list includes some of the primary instructional resources that may be used to teach the competencies and suggested objectives. Again, these resources are suggested and the list may be modified or enhanced based on needs and abilities of students and on available resources.
Construction Core Executive Summary

Course Description
The Construction Core instructional program provides a foundation of knowledge to prepare students for employment or continued education in several occupations related to the construction industry. The curriculum framework for this program was developed in partnership with the Mississippi Construction Education Foundation (MCEF). MCEF is the accredited sponsor for the National Center for Construction Education and Research (NCCER).

When developing this curriculum, the authors recognized the importance of incorporating differentiated instruction and the needs of the 21\textsuperscript{st}-century learners. Therefore, teaching strategies include a blend of online and face-to-face instruction that align with NCCER Connect e-books, online lectures, video presentations, online quizzes, active figures, and Spanish content. Students will have access to this information both to learn new content as well as to review, reinforce, or revise their work.

Industry Certification
The NCCER published the Learning Series as the set of industry standards that should be taught nationwide by contractors, associations, and secondary and postsecondary schools. To develop the Learning Series, the NCCER assembled a team of subject-matter experts that represented construction companies and schools across the nation. Each committee met several times, combining experts’ knowledge and experience to finalize the benchmarks and requirements included in the standards.

As a part of the certification process, all Mississippi Construction pathway instructors will be required to successfully complete the Instructor Certification Training Program. Doing so ensures that instructors possess the necessary comprehensive knowledge and understanding of the standards.
This state-of-the-art curriculum is modeled after the Mississippi **NCCER Accredited Training and Education Facilities (ATEF)**. In order to become an NCCER ATEF program, school districts must meet the following set of requirements:

1. Use the approved curriculum.
2. All instructors must be NCCER certified.
3. All completed Form 200s and release forms on all student completions are to be forwarded to MCEF for proper approval. MCEF will in turn forward to NCCER for processing.
5. Have an active advisory committee with at least two commercial contractors involved.
6. Follow safety practices and Occupational Safety and Health Administration (OSHA) standards in the class and lab areas.
7. Involve commercial contractors in class presentations or field trips.
8. All construction programs must be included in the accreditation process.
9. Show active involvement in student leadership development (SkillsUSA).
10. Provide demonstrated placement into construction-related occupations, and provide timely reports to MCEF.
11. Districts will be required to complete a self-evaluation of all programs and host a site visit for a representative from industry to ensure that proper lab, safety, and instructional procedures are in place.
Assessment

Students will be assessed using the Construction Core Year 1 MS-CPAS2 test. The MS-CPAS2 blueprint can be found at http://info.rcu.msstate.edu/services/curriculum.asp. If there are questions regarding assessment of this program, please contact the Architecture & Construction instructional design specialist at the Research and Curriculum Unit at 662.325.2510.

Student Prerequisites

In order for students to be successful in the Construction program, the following student prerequisites are in place:

1. C or higher in English (the previous year)
2. C or higher in Math (last course taken or the instructor can specify the math)
   or
3. Instructor Approval and TABE Reading Score (eighth grade or higher)
   or
4. Instructor Approval

Teacher Licensure

The latest teacher licensure information can be found at http://www.mde.k12.ms.us/educator-licensure.

Professional Learning

If you have specific questions about the content of any of training sessions provided, please contact the Research and Curriculum Unit at 662.325.2510 and ask for a professional-learning specialist.
**Course Outlines**

**Option 1**

This curriculum consists of the following two 1-Carnegie unit courses:

1. Safety and Orientation to Construction (Course Code: 993102)
2. Introduction to Construction (Course Code: 993103)

**Course Description:** Safety and Orientation to Construction includes an introduction to the field as well as fundamentals of construction safety, tools, math, and blueprint reading, as well as basic carpentry, electrical, masonry, and plumbing skills.

**Course Description:** Introduction to Construction emphasizes an overview of construction-related trades such as carpentry, electrical wiring, masonry, and plumbing. This course gives students’ real-world, hands-on practice in these areas. This course should be taken only after students successfully pass Safety and Orientation to Construction.

Materials of this guide are intended for use in classrooms, meetings, professional development opportunities, workforce development opportunities, and school community gatherings. For this purpose, materials in this framework may be reproduced. Any other use of these materials is prohibited unless written permission is granted by the RCU.
Acknowledgments

The Carpentry curriculum was presented to the Mississippi Board of Education on April 17, 2008. The following persons were serving on the state board at the time:

Dr. Hank M. Bounds, Executive Secretary
Mr. Claude Hartley, Chair
Mr. William Harold Jones, Vice Chair
Mr. Howell “Hal” N. Gage
Dr. O. Wayne Gann
Ms. Rebecca Harris
Mr. Charles McClelland
Ms. Sondra Parker Caillavet
Ms. Rosetta Richards
Dr. David Sistrunk

Mike Mulvihill, Interim Associate State Superintendent of Education for the Office of Vocational Education and Workforce Development, at the Mississippi Department of Education assembled an oversight committee to provide input throughout the development of the Carpentry Curriculum Framework and Supporting Materials. Members of this task force were as follows:

John Bass, Mississippi Manufacturing Association
Mike Barkett, Mississippi Construction Education Foundation
Sam Davis, Mississippi Department of Education
Andy Sims, Mississippi Department of Education
Dr. Bob Fuller, Starkville Public Schools
James Ivy, Northrop Grumman
Sarah Lay, Student, Vicksburg, MS
Dr. Edward C. Mann, University of Southern Mississippi
Jennifer Marshall, Viking Corporation
Jackie McElwain, Kosciusko Public Schools
Mike McCullough, East Mississippi Community College
Darnell Ramshur, Carl Loftin Vocational Center
Kirk Sullivan, Simpson County Vocational Center
Meda Vassar, Pontotoc County School District
Minadene Waldrop, Rankin County Schools
Jo Ann Watts, Research and Curriculum Unit
Doug Ferguson, Research and Curriculum Unit
Haley Weeks, Petal Vocational Center
Bill Welch, Mississippi Department of Education
Maurice Whalen, Clinton Career Complex
Lisa White, Carl Loftin Vocational Center
Also, a special thanks is extended to the teachers who contributed teaching and assessment materials that are included in the framework and supporting materials. Members who contributed were as follows:

Barry Evans, Hinds Community College, Rankin
Steve Hurdle, Oxford-Lafayette School of Applied Technology, Oxford
Marvin Moak, Hinds Community College, Raymond
Edna Nelson, Greenwood Career Center, Greenwood
Darnell Nunn, Humphreys County Vocational Center, Belzoni
Woodrow Price, Martin Luther King Career Technology Center, Woodville
Howie Schiedel, Meridian Community College, Meridian
Larry Stewart, Jackson Career Development Center, Jackson

Appreciation is expressed to the following staff members at the Mississippi Department of Education who provided guidance and insight throughout the development process:

Mike Barkett, Office of Career and Technical Education, Mississippi Department of Education
Bill McGrew, Director of Instructional Programs, Office of Career and Technical Education, Mississippi Department of Education

Finally, standards in the Carpentry Curriculum Framework and Supporting Materials are based on the following:

Contren Learning Series from the National Center for Construction Education and Research

Applied Academic Credit Benchmarks
Mississippi Department of Education 2007 Mathematics Framework Revised

21st Century Skills and Information and Communication Technologies Literacy Standards
In defining 21st century learning, the Partnership for 21st Century Skills has embraced five content and skill areas that represent the essential knowledge for the 21st century: global awareness; civic engagement; financial, economic, and business literacy; learning skills that encompass problem-solving, critical-thinking, and self-directional skills; and Information and Communication Technology (ICT) literacy.

ACT College Readiness Standards

The College Readiness Standards are sets of statements intended to help students understand what is expected of them in preparation for the ACT. These standards are integrated into teaching and assessment strategies throughout the curriculum framework.
Preface

Secondary vocational–technical education programs in Mississippi are faced with many challenges resulting from sweeping educational reforms at the national and state levels. Schools and teachers are increasingly being held accountable for providing true learning activities to every student in the classroom. This accountability is measured through increased requirements for mastery and attainment of competency as documented through both formative and summative assessments.

The courses in this document reflect the statutory requirements as found in Section 37-3-49, Mississippi Code of 1972, as amended (Section 37-3-46). In addition, this curriculum reflects guidelines imposed by federal and state mandates (Laws, 1988, ch. 487, §14; Laws, 1991, ch. 423, §1; Laws, 1992, ch. 519, §4 eff. from and after July 1, 1992; Carl D. Perkins Vocational Education Act IV, 2007; and No Child Left Behind Act of 2001).
Program Description

The curriculum framework for this program was developed in partnership with the Mississippi Construction Education Foundation (MCEF). MCEF is the accredited sponsor for the National Center for Construction Education and Research (NCCER).

When developing this curriculum, writers recognized the importance of differentiating instruction and meeting the needs of the 21st century learner. Teaching strategies included a blend of online and face-to-face instruction. Teaching strategies are aligned with Contren Connect e-books, online lectures, video presentations, online quizzes, active figures, and Spanish content. Students will have access to this information to learn new content as well as review, reinforce, or revise work.

Industry Certification

The NCCER developed and published a set of industry standards that are taught nationwide by contractors, associations, construction users, and secondary and postsecondary schools called the Contren Learning Series. When developing this set of standards, the NCCER assembled a team of subject matter experts that represented construction companies and schools across the nation. Each committee met several times and combined experts’ knowledge and experience to finalize the set of national industry standards.

As a part of the accreditation process, all Mississippi construction instructors will be required to successfully complete the Instructor Certification Training Program. This program ensures that instructors possess a deep knowledge of content of the standards.

This state-of-the-art curriculum is modeled after the eight Mississippi NCCER Accredited Training and Education Facilities (ATEF). In order to become an NCCER ATEF program, school districts must meet a set of guidelines including the following:

1. Use the approved curriculum.
2. All instructors must be NCCER certified.
3. All completed Form 200s and release forms on all student completions are to be forwarded to MCEF for proper approval. MCEF will in turn forward to NCCER for processing.
5. Have an active advisory committee with at least two commercial contractors involved.
6. Follow safety practices and Occupational Safety and Health Administration (OSHA) standards used in the class and lab areas.
7. Involve commercial contractors in class presentations or field trips.
8. All construction programs must be included in the accreditation process.
9. Show active involvement in student leadership development (e.g., VICA and SkillsUSA).
10. Provide demonstrated placement into construction-related occupations, and provide timely reports to MCEF.

Districts will be required to complete a self-evaluation of all programs and host a site visit from industry to ensure proper lab, safety, and instructional procedures are in place.
Assessment
Students will be assessed using the Carpentry MS-CPAS2 test. The MS-CPAS2 blueprint can be found at http://info.rcu.msstate.edu/services/curriculum.asp. If there are questions regarding assessment of this program, please contact the construction instructional design specialists at the Research and Curriculum Unit at 662.325.2510.

Student Prerequisites
In order for students to be successful in the Carpentry program, the following student prerequisites are in place:
1. C or higher in English (the previous year)
2. C or higher in Math (last course taken or the instructor can specify the math)
   or
3. Instructor Approval and TABE Reading Score (eighth grade or higher)
   or
4. Instructor Approval

Proposed Applied Academic Credit
Applied Math content from the curriculum was aligned to the 2007 Mississippi Math Framework Revised Academic Benchmarks. It is proposed that upon the completion of this program, students will earn 1/2 Applied Math credit that can be used for graduation requirements.

The applied academic credit has not been approved by the Mississippi Commission on School Accreditation or by the State Board of Education. If there are questions regarding applied academic credit, please contact the Coordinator of Workforce Education at the Research and Curriculum Unit at 662.325.2510.

Licensure Requirements
Teacher license 977 is required to teach Carpentry. The requirements for the 977 licensure endorsement are listed below:
1. Applicant must hold a 2-year college degree (associate’s degree) or higher from an accredited institution of higher education.
2. Applicant with an associate’s degree must have at least 2 years of verifiable occupational experience in the past 10 years. Experience must be appropriate to the subject to be taught. Applicant with a bachelor’s or higher degree must have at least 1 year of verifiable occupational experience in the past 10 years. Experience must be appropriate to the subject to be taught.
3. Applicant must enroll immediately in the Vocational Instructor Preparation (VIP) or the Redesign Education Program (REP).
4. Applicant must complete the individualized Professional Development Plan (PDP) requirements of the VIP or REP prior to the expiration date of the 3-year vocational license.
5. Applicant must validate occupational competency by earning a passing score on the Commercial Carpentry assessment through NCCER National Craft Assessment and Certification Program.
6. Applicant must successfully complete the Contren Instructor Certification.
7. Applicant must successfully complete an MDE-approved computer literacy certification exam.
8. Applicant must successfully complete certification for an online learning workshop, module, or course that is approved by the MDE.
9. Applicant must successfully complete the Construction certification workshop, module, or course that is approved by the MDE.

Note: If the applicant meets all requirements listed above, that applicant will be issued a 977 endorsement—a 5-year license. If the applicant does not meet all requirements, the applicant will
be issued a 3-year endorsement (license), and all requirements stated above must be satisfied prior to the ending date of that license.

**Professional Learning**
The professional learning itinerary for the middle school or individual pathways can be found at http://redesign.rcu.msstate.edu. If you have specific questions about the content of each training session provided, please contact the Research and Curriculum Unit at 662.325.2510, and ask for the Professional Learning Specialist.

**Course Outlines**
This curriculum framework allows options for local school districts to meet student needs and scheduling demands. One option groups units into two one-Carnegie-unit courses. The second option groups units into one two-Carnegie-unit course. A discussion of each option is provided below.

**Option 1**
Upon completion of this option, the student will be trained to take the Contren Level 1 Certification exam. This curriculum consists of two one-credit courses, which should be completed in the following sequence:

1. Theory and Application of Carpentry I (Course Code: 993111)
2. Theory and Application of Carpentry II (Course Code: 993112)

**Course Description:** Theory and Application of Carpentry I includes an in-depth study of materials used in the carpentry field, foundations, and floor framing. This course also reinforces safety related to the construction industry. This one-Carnegie-unit course should only be taken after students successfully pass Introduction to Construction.

**Course Description:** Theory and Application of Carpentry II includes an in-depth study of wall and ceiling framing, roof framing, windows and doors, and stair layout. This course also reinforces safety related to the construction industry. This one-Carnegie-unit course should only be taken after students successfully pass Theory and Application of Carpentry, Part A.

**Theory and Application of Carpentry I (Course Code: 993111)**

Option 2

This option will prepare students for employment in the content area chosen and prepare students to complete the **Contren Level 1 Certification**. Students are encouraged to take this certification exam. This curriculum consists of one two-credit course, which should be completed in the following sequence:

1. **Carpentry (Course Code: 993110)**

**Course Description:** The Carpentry course consists of an in-depth study of foundations; wall and ceiling framing; room framing; windows and doors; and stair layout. Upon the completion of this course, students will have the knowledge to complete the Contren Level I Certification.

Office of Career and Technical Education
Mississippi Department of Education
Jackson, MS 39205

Research and Curriculum Unit
Mississippi State University
Mississippi State, MS 39762

The Mississippi Department of Education, Office of Career and Technical Education does not discriminate on the basis of race, color, religion, national origin, sex, age, or disability in the provision of educational programs and services or employment opportunities and benefits. The following office has been designated to handle inquiries and complaints regarding the non-discrimination policies of the Mississippi Department of Education: Director, Office of Human Resources, Mississippi Department of Education, 359 North West Street, Suite 203, Jackson, Mississippi 39201, (601) 359-3511.
Secondary career-technical education programs in Mississippi are faced with many challenges resulting from sweeping educational reforms at the national and state levels. Schools and teachers are increasingly being held accountable for providing true learning activities to every student in the classroom. This accountability is measured through increased requirements for mastery and attainment of competency as documented through both formative and summative assessments.

The courses in this document reflect the statutory requirements as found in Section 37-3-49, Mississippi Code of 1972, as amended (Section 37-3-46). In addition, this curriculum reflects guidelines imposed by federal and state mandates (Laws, 1988, ch. 487, §14; Laws, 1991, ch. 423, §1; Laws, 1992, ch. 519, §4 eff. from and after July 1, 1992; Carl D. Perkins Vocational Education Act III, 1998; and No Child Left Behind Act of 2001).

Each secondary career-technical course consists of a series of instructional units which focus on a common theme. All units have been written using a common format which includes the following components:

- **Unit Number and Title**

- **Suggested Time on Task** - An estimated number of clock hours of instruction that should be required to teach the competencies and objectives of the unit. A minimum of 140 hours of instruction is required for each Carnegie unit credit. The curriculum framework should account for approximately 75-80 percent of the time in the course.

- **Competencies and Suggested Objectives**
  - A competency represents a general concept or performance that students are expected to master as a requirement for satisfactorily completing a unit. Students will be expected to receive instruction on all competencies.
  - The suggested objectives represent the enabling and supporting knowledge and performances that will indicate mastery of the competency at the course level.

- **Suggested Teaching Strategies** - This section of each unit indicates strategies that can be used to enable students to master each competency. Emphasis has been placed on strategies which reflect active learning methodologies. Teachers should feel free to modify or enhance these suggestions based on needs of their students and resources available in order to provide optimum learning experiences for their students.

- **Suggested Assessment Strategies** - This section indicates strategies that can be used to measure student mastery. Examples of suggested strategies could include rubrics, class participation, reflection, and journaling. Again, teachers should feel free to modify or enhance these suggested assessment strategies based on local needs and resources.

- **Integrated Academic Topics, Workplace Skills, Technology Standards, and Occupational Standards** - This section identifies related academic topics as required in the Subject Area Assessment Program (SATP) in Algebra I, Biology I, English II, and U. S. History from 1877, which are integrated into the content of the unit. It also identifies the 21st Century Skills, which were developed by the Partnership for 21st Century Skills, a group of business and education organizations concerned about the gap between the knowledge and skills learned in school and those needed in communities and the workplace. A portion of the 21st Century Skills addresses learning skills needed in the 21st century, including information and communication skills, thinking and problem-solving skills, and interpersonal and self-directional skills. The need for these types of skills have been recognized for some time and...
the 21st Century Skills are adapted in part from the 1991 report from the U.S. Secretary of Labor’s Commission on Achieving Necessary Skills (SCANS). Another important aspect of learning and working in the 21st century involves technology skills, and the International Society for Technology in Education, developers of the National Education Technology Standards (NETS), were strategic partners in the Partnership for 21st Century Skills.

- **References** - A list of suggested references is provided for each unit. The list includes some of the primary instructional resources that may be used to teach the competencies and suggested objectives. Again, these resources are suggested and the list may be modified or enhanced based on needs and abilities of students and on available resources.
Culinary Arts Executive Summary

Pathway Description

*Culinary Arts is a* pathway for students in the Hospitality and Tourism Career Cluster. The following description is from the Mississippi Department of Education’s current Standard Course of Study for Career–Technical Education.

The Culinary Arts Pathway includes classroom and hands-on experiences that will prepare students for employment or continuing education in the foodservice industry. This program was written to incorporate the *National Restaurant Associations (NRA) ProStart* learning objectives. Any student who successfully completes this program and the mentoring requirements will be eligible to take the National ProStart Certificate of Achievement exam, which is a certification recognized in the foodservice industry nationwide.

Industry Certification

This program was designed to articulate to postsecondary Food Production, Hotel and Restaurant Management, and Culinary Arts. Industry standards are based on the NRA’s ProStart and ServSafe Certifications.

Assessment

Students will be assessed at the end of their first year using the first-year Mississippi Career Planning and Assessment System (MS-CPAS2) test for Culinary Arts, which is based on content from the first year of Culinary Arts curriculum. At the end of their second year, students will be assessed using the second-year MS-CPAS2 test for Culinary Arts, which is based on content from the second year of the Culinary Arts curriculum. The MS-CPAS2 blueprint can be found at http://www.rcu.msstate.edu/Curriculum/CurriculumDownload.aspx. Any questions regarding
assessment of this program should be directed to the Culinary Arts instructional design specialists at the Research and Curriculum Unit who can be reached at 662.325.2510.

**Student Prerequisites**

In order for students to experience success in the Culinary Arts program, the following student prerequisites are required:

1. C or higher in English (the previous year)
2. C or higher in Math (last course taken or the instructor can specify the math course)
   
   or

3. Instructor approval and a TABE Reading Score of eighth grade or higher
   
   or

4. Instructor approval

**Applied Academic Credit**

The mathematics content in the Culinary Arts program is meaningful and useful to students who are entering the foodservice industry. Applied mathematics content was aligned to the 2007 Mississippi Mathematics Framework Revised Academic Benchmarks.

**Teacher Licensure**

The latest teacher licensure information can be found at [http://www.mde.k12.ms.us/educator-licensure](http://www.mde.k12.ms.us/educator-licensure).

**Professional Learning**

For specific questions about the content of any of the training sessions provided, please contact the Research and Curriculum Unit at 662.325.2510 and ask for a professional-learning specialist.
Course Outlines

Option 1—Four 1-Carnegie-Unit Courses

This curriculum consists of four one-credit courses, which should be completed in the following sequence:

1. Orientation to Culinary Arts — Course Code: 996002
2. Theory and Application of Culinary Arts I — Course Code: 996004
3. Theory and Application of Culinary Arts II — Course Code: 996005
4. Advanced Studies in Culinary Arts — Course Code: 996006

Course Description: Orientation to Culinary Arts includes a survey of the foundational skills necessary in the foodservice industry. Content such as food safety and sanitation, equipment, safety and security, culinary foundations and math, and an introduction to the hospitality industry are included in the course. Mastery of the competencies listed in the food safety and sanitation unit will prepare the student to take the NRA’s ServSafe exam to become ServSafe Food Safety certified. As of January 1, 1999, every foodservice establishment in Mississippi must have a full-time certified food manager employed in order to meet the FDA Food Code requirements. Students are encouraged to take this exam (Course Code: 996002).

Course Description: Theory and Applications of Culinary Arts I emphasizes real-world, hands-on practice of food preparation. Food preparation techniques included in this course include breakfast foods, dairy, and sandwiches; fruits, vegetables, salads, and garnishes; and potatoes and grains. This 1-Carnegie unit course should be taken only after students successfully pass Orientation to Culinary Arts (Course Code: 99004).

Course Description: Theory and Applications of Culinary Arts II emphasizes real-world, hands-on practice of food preparation. Food preparation techniques included in this course include desserts and baked goods; meat, poultry, and seafood; and stocks, sauces, and soups. This 1-
Carnegie unit course should be taken only after students successfully pass Theory and Applications of Culinary Arts I (Course Code: 996005).

**Course Description:** Advanced Studies in Culinary Arts is a culminating course that places emphasis on an internship experience. While students participate in on-the-job training, they will use their skills related to management and business concepts, customer communication, and customer service. Before students can complete the Advanced Placement Culinary Arts course, they must meet the following requirements (Course Code: 996006):

- Score 80% or higher on the MS-CPAS2 summative assessment or ProStart Exam;
- Maintain an attendance rate of 92% or better in Orientation to Culinary Arts (Course Code: 996002), Theory and Applications of Culinary Arts parts A and B (Course Code: 996004 and 996005), and Advanced Studies in Culinary Arts (Course Code: 996006) courses; and
- Find a job related to the culinary industry.

The Research and Curriculum Unit (RCU), located in Starkville, MS, as part of Mississippi State University, was established to foster educational enhancements and innovations. In keeping with the land grant mission of Mississippi State University, the RCU is dedicated to improving the quality of life for Mississippians. The RCU enhances intellectual and professional development of Mississippi students and educators while applying knowledge and educational research to the lives of the people of the state. The RCU works within the contexts of curriculum development and revision, research, assessment, professional development, and industrial training.

The Mississippi Department of Education, Office of Career and Technical Education does not discriminate on the basis of race, color, religion, national origin, sex, age, or disability in the provision of educational programs and services or employment opportunities and benefits. The following office has been designated to handle inquiries and complaints regarding the non-discrimination policies of the Mississippi Department of Education: Director, Office of Human Resources, Mississippi Department of Education, 359 North West Street, Suite 203, Jackson, Mississippi 39201, (601) 359-3511.
Foreword

Secondary career-technical education programs in Mississippi are faced with many challenges resulting from sweeping educational reforms at the national and state levels. Schools and teachers are increasingly being held accountable for providing true learning activities to every student in the classroom. This accountability is measured through increased requirements for mastery and attainment of competency as documented through both formative and summative assessments.

The courses in this document reflect the statutory requirements as found in Section 37-3-49, Mississippi Code of 1972, as amended (Section 37-3-46). In addition, this curriculum reflects guidelines imposed by federal and state mandates (Laws, 1988, ch. 487, §14; Laws, 1991, ch. 423, §1; Laws, 1992, ch. 519, §4 eff. from and after July 1, 1992; Carl D. Perkins Vocational Education Act III, 1998; and No Child Left Behind Act of 2001).

Each secondary career-technical course consists of a series of instructional units which focus on a common theme. All units have been written using a common format which includes the following components:

- **Unit Number and Title**
- **Suggested Time on Task** - An estimated number of clock hours of instruction that should be required to teach the competencies and objectives of the unit. A minimum of 140 hours of instruction is required for each Carnegie unit credit. The curriculum framework should account for approximately 75-80 percent of the time in the course.
- **Competencies and Suggested Objectives**
  - A competency represents a general concept or performance that students are expected to master as a requirement for satisfactorily completing a unit. Students will be expected to receive instruction on all competencies.
  - The suggested objectives represent the enabling and supporting knowledge and performances that will indicate mastery of the competency at the course level.
- **Suggested Teaching Strategies** - This section of each unit indicates strategies that can be used to enable students to master each competency. Emphasis has been placed on strategies which reflect active learning methodologies. Teachers should feel free to modify or enhance these suggestions based on needs of their students and resources available in order to provide optimum learning experiences for their students.
- **Suggested Assessment Strategies** - This section indicates strategies that can be used to measure student mastery. Examples of suggested strategies could include rubrics, class participation, reflection, and journaling. Again, teachers should feel free to modify or enhance these suggested assessment strategies based on local needs and resources.
- **Integrated Academic Topics, Workplace Skills, Technology Standards, and Occupational Standards** - This section identifies related academic topics as required in the Subject Area Assessment Program (SATP) in Algebra I, Biology I, English II, and U. S. History from 1877, which are integrated into the content of the unit. It also identifies the 21st Century Skills, which were developed by the Partnership for 21st Century Skills, a group of business and education organizations concerned about the gap between the knowledge and skills learned in school and those needed in communities and the workplace. A portion of the 21st Century Skills addresses learning skills needed in the 21st century, including information and communication skills, thinking and problem-solving skills, and interpersonal and self-directional skills. The need for these types of skills have been recognized for some time and
the 21st Century Skills are adapted in part from the 1991 report from the U.S. Secretary of Labor’s Commission on Achieving Necessary Skills (SCANS). Another important aspect of learning and working in the 21st century involves technology skills, and the International Society for Technology in Education, developers of the National Education Technology Standards (NETS), were strategic partners in the Partnership for 21st Century Skills.

- **References** - A list of suggested references is provided for each unit. The list includes some of the primary instructional resources that may be used to teach the competencies and suggested objectives. Again, these resources are suggested and the list may be modified or enhanced based on needs and abilities of students and on available resources.
Introduction to Agriscience Executive Summary

Course Description

The Introduction to Agriscience course introduces students to the broad field of agriculture, biotechnology, and natural resources, including the production of plants and animals and the management of natural resources. The program includes instruction in the applied sciences related to plant and animal production and natural resource conservation and management, as well as introduces agribusiness management practices and maintenance of facilities and equipment. Students in the course will participate in active learning exercises, including integral activities of the FFA organization and supervised experiences. Students who successfully complete the competencies in this course will possess fundamental knowledge and skills that can be used to secure entry-level employment or as a foundation for continuing their education. Industry standards are adapted from Career Cluster Resources for Agriculture, Food, and Natural Resources, a publication developed by the National Association of State Directors of Career and Technical Education.

Industry Certification

No national industry-recognized certifications are known to exist at this time. However, competencies and suggested performance indicators in the Introduction to Agriscience course have been correlated to the National Agriculture, Food, and Natural Resources (AFNR) Career Cluster Content Standards that have been reviewed and endorsed at the national level by the National Council on Agricultural Education.
**Student Prerequisites**

In order for students to be able to experience success in the Introduction to Agriscience course, the following prerequisites are in place:

1. C or higher in English (the previous year)
2. C or higher in Math (last course taken or the instructor can specify the math)
3. Instructor approval and a TABE Reading Score of eighth grade or higher
   
   or
   
   1. TABE Reading Score (eighth grade or higher)
   2. Instructor approval
      
      or
      
      1. Instructor approval

**Applied Academic Credit**

Content of the Introduction to Agriscience course has been aligned to the *2010 Mississippi Science Curriculum Framework*. Students who successfully complete the Introduction to Agriscience curriculum will receive one Carnegie unit for science and an additional 0.5 Carnegie unit for completion of the Supervised Agricultural Experience (SAE).

**Teacher Licensure**

*The latest teacher licensure information can be found at* [http://www.mde.k12.ms.us/educator-licensure](http://www.mde.k12.ms.us/educator-licensure).

**Professional Learning**

If you have specific questions about the content of any of training sessions provided, please contact the Research and Curriculum Unit at 662.325.2510 and ask for a professional-learning specialist.
