- Gap analysis identifies any disparity in assessment proficiency between student subgroups. For example, the gap (or difference) between the percentage of proficient African-American students and the percentage of proficient White students:  
 $\% \text{ Proficient White students (reference)} = 51.3$   
 $\% \text{ Proficient African-American students} = 22.4$   
 $\text{Gap: } 22.4 - 51.3 = -28.9\%$
- Grey shading indicates the reference subgroup, except the "All Students" category which is not being used for comparison
- A negative gap indicates lower performance in the comparison subgroup when compared to the reference subgroup. A positive gap indicates higher performance in the comparison subgroup when compared to the reference subgroup
- The Increase/Decrease in achievement gap indicates whether the gap widened (an increase) or closed (a decrease) from the prior year.
- The Gap to State 2027 Goal is the difference between the percent proficient for the subgroup and 70%.
