

Change User Password

All users have the ability to change his/her password (**Security=>Change User Password**) in MSIS.

When the form comes up, Enter your old password and then enter your new password twice. Click ok.

A screenshot of the "Change User Password" dialog box. The dialog has a title bar with the text "Change User Password" and a close button. Inside the dialog, there are four input fields: "Login Name", "Old Password", "New Password", and "Re-Enter New Password". At the bottom of the dialog are two buttons: "OK" and "Cancel".
