COURSE INTRODUCTION:

Career Development
The units in career development are designed to assist students in developing the knowledge and skills to make sound decisions about their educational and career goals. Recognizing that career development is a lifelong process, these units build around the concepts of career awareness in the elementary grades, career exploration at the middle school level, and planning and decision making at the high school level. The ultimate outcome is that all students will develop and maintain a rigorous and relevant personal plan of study that will guide them into a successful postsecondary transition. The three major areas covered are:

Applying career exploration and planning skills in the achievement of life career goals
Major points: This area includes individual planning skills as vital learning for K-12 students. Career exploration and planning skills are developmental in nature and build upon each of the other domains. Career exploration emphasizes the dignity and necessity of all work and workers, the role of preferences and skills in job satisfaction, and the concept of a balanced life. Included will be the inter-relationship of all parts of one’s life (e.g., family, community, work, and personal interests) across the lifespan. The concept of life career planning emphasizes the integration of knowledge and understanding of skills required in the world of work and daily living.

Knowing where and how to obtain information about the world of work and postsecondary training/education
Major points: This area is intended to help K-12 students know how to seek information that is credible, age appropriate, and unbiased. Students will be provided with systematic and sequential opportunities to learn about and understand the level of preparation required for various occupations (e.g., apprenticeships, career and technical education, four-year/two-year college or university, and the military). Knowledge, skill, and understanding will include the kinds of career information resources available (e.g., print, electronic, personal interviews) and how to access the information independently. The purpose is to add to the individual’s ability to be an advocate for self.

Applying skills for college and career readiness and success
Major points: College and career readiness is considered to be developmental in nature and includes helping K-12 students develop individual skills of responsibility taking, dependability, punctuality, integrity, self-management, effort, respect for other’s differences, and the ability to work effectively as a team member. It is evident that college and career readiness requires both academic and personal/social skills in order to be successful in the classroom and in the workplace.
**UNIT DESCRIPTION:** Respecting All Work

Through this unit, students will have opportunities to better understand how they relate to others. They will compare their school and community activities with their career goals and project what their life may be like in the future. Students will convey their understanding of exploration and planning in the achievement of their life career goals.

**SUGGESTED UNIT TIMELINE:** 4 Lessons

**CLASS PERIOD:** 55-70 minutes per lesson

**ESSENTIAL QUESTIONS:**

1. How do people get along?
2. How do people decide what to do with their lives?
3. How can a person make a contribution to the well-being and betterment of the local and global society?
