The Mississippi State Board of Education and MDE have been working strategically over the past three years to improve students outcomes. Our work has been targeted, deliberate and focused in order to make the maximum impact with the resources and flexibility we have been afforded.

Mrs. Rosemary Altman
MS State Board President
We still have improvements to make with our lowest performing schools across the state based on 2017 Accountability results.

Proficiency – ELA, Mathematics, Science, History
Growth – All Students and Bottom 25%
Acceleration
Graduation Rate
Participation Rate
Therefore, in an effort to provide individualized guidance and assistance to schools that received an “F” accountability rating, the Mississippi Department of Education (MDE) will facilitate a process wherein districts/schools that did not demonstrate improvement to a “D” or better in 2017 will discuss the previously implemented, school board approved SAR Plan of Action to address strengths, deficiencies, challenges, and next steps for improving student outcomes.
Federal and State Expectations

By state law we are required to conduct an evaluation, provide assistance and report on those schools that are in need of improvement (MS Code 37-18-3 and 37-18-5).

By federal law we are required to continue to provide support for interventions in schools that are identified as Priority or Focus.

By State Board of Education goals we are required to support every school/district so that they can improve to an accountability rating of “C” or higher.
