Family Engagement Framework Resources ........................................................................... 40
Introduction

Mississippi's vision for family engagement is a multi-generational strategy. Families are the key to a child’s early development and learning. As such, a goal of family engagement must be to support family well-being. Mississippi’s family engagement initiatives and the family engagement practices of educators should promote the safety, health, and financial security of families so they can successfully guide and develop their children. In their separate domains, educators and families both understand the importance of social-emotional skills — that the ability to manage emotions, to empathize, and to collaborate is key to fulfillment and success, in school and in life. But schools, families, and communities are not always in sync on how to develop those competencies.

The Mississippi Department of Education values the role that administrators, teachers, families, and communities play in promoting positive outcomes for lifelong learning. Family engagement is a critical component of high-quality education across the continuum of learning. When done well, family engagement practices can support the healthy social, emotional, cognitive, and physical development throughout the continuum of learning, regardless of ethnic or socioeconomic background. Similarly, families—particularly those with limited access to resources—benefit from family engagement practices when educators link them to the support they need, help build their peer networks, increase their understanding of child development, and provide classes and training to enhance family caregiver practices and improve job skills.

In 2017, the Council of Chief State School Officers (CCSSO) provided a family engagement technical assistance opportunity to coordinate the development of a framework. The framework contains a set of goals and family engagement practices it also identifies the state’s family engagement initiatives to push the work out to education communities.

Mississippi’s Family Engagement Framework, while informed by research and federal resources, utilizes the overall structure of the Parent, Family and Community Engagement Framework published by the Office of Head Start. It is important to note the strategies are not additional program requirements, but rather guidelines for high-quality practices.

Mississippi’s Family Engagement Coalition has identified innovative strategies to support families as well as opportunities for family members to develop their skills, learn about child development, and become more socially and financially self-sufficient.

---

**MISSISSIPPI STATE BOARD OF EDUCATION**

**STRATEGIC PLAN GOALS**

1. **All Students Proficient and Showing Growth in All Assessed Areas**
2. **Every Student Graduates from High School and is Ready for College and Career**
3. **Every Child Has Access to a High-Quality Early Childhood Program**
4. **Every School Has Effective Teachers and Leaders**
5. **Every Community Effectively Uses a World-Class Data System to Improve Student Outcomes**
6. **Every School and District is Rated “C” or Higher**
**Purpose**

Mississippi’s Family Engagement Framework is designed to support intentional thinking and actions regarding the implementation of family engagement policies and practices both at the state level and among educators who serve ALL children.

Families are the key to a child’s academic success. Every educational learning community should invest in a system that embraces and empowers families of students from birth to young adulthood. Family engagement for school success should focus on building trusting relationships with families and maintaining consistent communication throughout the learning experience. Effective family engagement programs should provide and implement activities that prepare, tell, teach, and engage responsible individuals invested in the educational success of a child.²

Students with involved parents – regardless of income, background characteristics, or level of achievement – are more likely to do better in school. Partnership programs can increase student achievements, improve attendance and behavior, and promote positive social skills. When partnership practices are linked to school goals (e.g., reading, math, attendance, etc.), more and different families become involved in ways that directly assist students’ learning and development.

The Framework should be used to assess current family engagement activities and promote policies and practices that support family engagement. More specifically, the purpose of this document is to:

- Recognize the importance of family engagement as a core, foundational component of education;
- Put forth a set of common goals for family engagement across the education system and within individual educators; and
- Offer family engagement strategies for educators and identify resources that support the implementation of those strategies.

It is important to note that a number of community organizations and educators offer family engagement initiatives throughout Mississippi. This document is written to support all community stakeholders such as museums, public libraries, medical offices, hospitals, community colleges, advocacy groups, and other community organizations as they work on a daily basis to support similar goals outlined in this Framework.

---

² Implementing Effective Programs, Engagement Center on School, Family, and Community Partnerships. Joyce L. Epstein, Ph.D., Director of Family and Community for Student Success in School, Family, and Community Partnerships.
The guiding principles of the Mississippi Family Engagement Coalition is to effectively empower and foster sustainable family engagement strategies to serve early learning directors, school administrators, educators, children, and families in the following ways:

- Develop positive, respectful, and empathetic relationships between educators and families as the foundation for successful family engagement strategies.

- Encourage family engagement strategies that are appropriately resourced and designed, and which promote ownership and investment to meet the specific needs for improving student achievement and overcoming constraints for all Mississippi families.

- Create and foster advocacy from families, educators, and community members for all children’s educational needs.

- Empower family-centered partnerships to gain a greater understanding of how a family’s strengths, needs, and resources affect a child’s safety, stability, well-being and school readiness success.

- Provide ongoing professional development and ongoing conversations for families and educators to obtain the knowledge to build a solid partnership, inform decision-makers, and be effective advocates for all children.
Mississippi’s Family Engagement Definitions

**FAMILY** is a fundamental social group in communities consisting of a child(ren) and a parent, grandparent, guardian, caregiver, or any responsible individual invested in the educational success of a child.

**FAMILY ENGAGEMENT** is an ongoing, shared responsibility of families, educational programs, and communities for all student learning and academic achievement that continues from birth to young adulthood.

**EQUITABLE** means that families are empowered to work with educators, public officials, and community partners to remove any barriers that prevent them from being fully engaged in their child(ren)’s education. This includes access to ample opportunities to develop their knowledge and skills to become full and equal partners in that deliberate and intentional work.
The Mississippi Family Engagement Framework Structure

The Mississippi Department of Education Family Engagement Framework establishes a set of goals around high quality learning environments. The Mississippi Family Engagement Framework demonstrates the natural progression of transitioning from early learning settings to formalized school settings by creating a structure for educators that influences family-friendly schools to support student academic achievement, development, and success. As state educators work to support families with young children, they should target these specific family engagement goals.

GOALS

1. Welcome and Empower ALL Families
2. Increase Student Success
3. Build Leadership and Capacity
4. Develop Community Investment and Partnerships

CONTINUOUS SYSTEMS APPROACH

A continuous systems approach will work together to achieve the ultimate child outcomes for successful lifelong learners. Each section provides guidance of how family engagement outcomes for programs lead to family outcomes, which lead to successful child outcomes. As a result, those observed family interactions can produce positive outcomes in child behavior, social/emotional development, and school success.

Implementing a systematic plan for family, school, and community partnerships involves coordinating the work of guidance counselors, social workers, health professionals, community, parent involvement specialists, instructional staff, staff, administrators, and most importantly, families and children. Epstein (2002), Halgunseth (2009), and NAEYC (2009) describe components of a well-coordinated system:
Program standards

- Ensure that all program guidelines are clear, comprehensive, and emphasize ongoing family/community outreach.

- Provide all education staff, including administrators, teachers, teacher assistants, social workers, counselors, nurses, lunch assistants, and custodial staff with training on cultural awareness, sensitivity, and research-based family engagement practices.

Culture and community

- Promote the acceptance of all families by integrating daily activities in the curriculum that teach awareness and appreciation of the different cultures, practices, and traditions of children in individual classrooms and within the community at large.

- Encourage school staff to be aware of how personal experiences influence cultural perspective and shape approaches to child-rearing, development, and learning.

Family engagement

- Get to know each family and focus on family strengths and knowledge.

- Based on the comfort level of families, make home visits before and during the school year. Visits made by classroom teachers and/or school social workers can provide staff with a foundational understanding of the home environment, child and family interests, and any particular needs.

- Implement activities and services that promote positive child-rearing skills and an understanding of child development, including the importance of play and experiential learning in effective kindergarten classrooms.

- Involve families in learning activities at home with their children, including homework and curriculum-related activities.

- Offer specific, individualized strategies that will help families guide their children to be successful in the school environment.

- Create a browsing and checkout library with books, videos, cassettes, brochures, and magazines. These resources and services should be provided on a flexible schedule to accommodate all parents considering their various work schedules.
Communication:

- Greet families during drop-off and dismissal times. Have teachers use these times to share information about a child with families.
- Whenever possible, converse with families in their home language.
- Consistently communicate with families about school programs and student progress through school-to-home and home-to-school communications, including family conferences.
- Focus on verbal communication when written language is an obstacle for the family.
- Send frequent communications to families about both individual children and classroom content and expectations. This includes face-to-face communication, printed material, and electronic means of communication.

Volunteer opportunities

- Provide flexible opportunities for families to volunteer and to attend school programs.
- Ask families to participate in something that is beneficial of their time and meaningful.

Decision making

- Include families as participants in school decisions, governance, and advocacy through the school advisory council, committees, action teams, and other family organizations.
- Hold meetings at different times of the day to accommodate working schedules of families.
- Make it easy for families to attend meetings and trainings by offering transportation and child care. Organizations should consider providing childcare, transportation, and/or meals in order to ease hardships for families attending engagement events.

Community collaboration

- Provide families with information related to health and social services, refer families to appropriate community agencies when needed, and follow up with community referrals.
- Coordinate community resources and services for children, families, and the school with businesses, colleges, agencies, and other entities serving families and the local community.
GOAL 1

To empower families to have the skills, resources, and confidence to address their basic needs and can take on roles that contribute to their child’s learning.

Creating an environment where all stakeholders feel valued, respected, and connected is key to welcoming all families. Educational leadership, teachers, and staff are instrumental in fostering positive relationships to build and sustain a welcoming educational environment. Welcoming and empowering ALL families involves valuing cultural proficiency, the importance of diversity, and individual abilities. Understanding and respecting diverse family dynamics and cultures represented in the school community helps to identify and remove barriers and provides opportunities for meaningful engagement.

Family engagement begins prior to a child entering school. It is important to begin with understanding the composition of a family unit and how family engagement has evolved over the years. There has been a shift in thinking from parent involvement to family engagement. The recognition and value around the family impact is integral to creating and sustaining an environment to promote successful lifelong learners.

Clear, ongoing, two-way communication and relationship building opportunities are essential for successful school-home partnerships. Education communities must provide multiple methods of communication. Communication should be written in family-friendly terms and available in languages that meet the needs of all families. When families and educators communicate effectively, positive relationships develop, conflicts are easily resolved, and students make greater progress. Building respectful and trusting relationships among school staff, families, and community members is critical for establishing sustained connections that support ongoing student learning and success.
**OUTCOMES**
*Welcome and Empower ALL Families*

To empower families to have the skills, resources, and confidence to address their basic needs and can take on roles that contribute to their child’s learning.

<table>

National Association for the Education of Young Children (NAEYC)
The National Association for the Education of Young Children (NAEYC) is a professional membership organization that works to promote high-quality early learning for all young children, birth through age eight, by connecting early childhood practice, policy, and research.
https://www.naeyc.org/
GOAL 2

To promote positive, encouraging relationships that provide opportunities to focus energy towards learning and continued success in school.

Research clearly documents the link between competent caregiving abilities, strong caregiver-child bonds, and positive school readiness outcomes. Given the importance of adult-child relationships, it is imperative that Mississippi’s family engagement initiatives and the practices of educators have the goal, beginning with the transition to parenthood, of supporting families in developing positive relationships that nurture their child’s learning and development. This begins with developing positive, nurturing relationships among adults, including between staff members, and between staff and caregivers and other adult family members. Engaging and empowering families as partners in education creates essential relationships that can produce success for students.

Parent, family, school, and community engagement in education is a key element for student learning and success. Schools must be intentional and culturally responsive in their efforts to engage all families. Clearly defined, well-communicated goals and strategies help families and teachers work together to ensure that all students succeed. This includes preparing families to support students’ academic, social, emotional, and physical needs as students transition throughout their academic years. When families are equal partners, there is increased student academic performance, better attendance, and a more successful pathway to college-and career-readiness.

---

OUTCOMES
Increase Student Success

To promote positive, encouraging relationships that provide opportunities to focus energy towards learning and continued success in school.

- Recognize existing ways families are supporting their children’s development and success.
- Develop curriculum and program activities that connect families to the learning of their children.
- Provide information to staff on best practices focused on family engagement, especially best practices for increasing the engagement of low-income families.
- Take an active role in ensuring that children attend school regularly (at least 90% attendance).
- Share information about their child with educators to inform teaching and learning.
- Partner with teachers and use new approaches to support their child’s learning at home and in the community.
- Help their child learn important skills at home and in their communities.
- Celebrate their child’s learning and developmental accomplishments.
- Improve their self-concept.
- Increase their intellectual growth.
- Enlarge their understanding of the world, people, experiences, and ideas.
- Increase their competencies and skills in oral language, literacy, writing, listening, and thinking.
- Increase their competencies and skills in mathematical reasoning and scientific exploration.
- Increase their skills involved in physical coordination and gross and fine motor skills.
- Increase their competence in dealing with emotions, feelings, and social situations.
- Increase their self-direction and independence.
- Develop cooperative, trusting relationships.
- Develop their natural curiosity and creative potential.
- Develop a love of learning.

GOAL 3

To support the educational aspirations of families as leaders and advocates through the educational transitions from early childhood to completion of their child’s secondary education.

When families strive to achieve educational goals, they become a positive example to children regarding the importance of education. Research has documented the link between family focused education—particularly maternal education levels—and positive school readiness outcomes. The practices of educators should support families to advance their own interests through education, training, and experiences to support college- and career-readiness goals. When families are empowered, they can be a strong force for positive change in their child’s education and in many other areas of life. Educators should provide support to families to participate in leadership development, decision-making, program policy development, and community and state organizing activities which may improve children’s development and learning experiences.

When a child transitions to a new educator, or through the formal education system, the child and the family experience change in this setting, teacher, and/or learning culture. These transitions are challenging for families—and often for educators—to navigate. Educators should build systems of support for families as they make transitions with their children to new education systems. A systems approach will strengthen the family and the education setting as a whole for the betterment of the child.

## OUTCOMES

### Build Leadership and Capacity

To support the educational aspirations of families as leaders and advocates through the educational transitions from early childhood to completion of their child’s secondary education.

### PROGRAM

- Obtain knowledge and skills to create leadership and advocacy opportunities for families.
- Provide professional development for local educational agency and school personnel regarding family engagement strategies.
- Provide supportive programs that reach family members at home, in the community, and at school.
- Monitor and evaluate efforts of effectiveness through high quality, evidenced-based strategies.
- Utilize various reciprocal communication strategies to build individual relationships with families.

### FAMILY

- Express questions, concerns, and recommendations about their child’s education.
- Express opinions concerning their child’s program’s goals and policies.
- Know and assert their rights under federal and state laws.
- Participate on program boards and/or participate in other decision-making opportunities.
- Reach out and engage other families (e.g., new families) to offer knowledge and support.
- Volunteer in and/or contribute to their children’s classrooms and program.
- Seek out new leadership and/or advocacy opportunities as children transition to new settings.
- Set learning goals that align with their interests and career aspirations.
- Enroll and participate in courses, training programs, and/or learning opportunities that support their education and career goals.

### CHILD

- Improve their self-concept.
- Increase their intellectual growth.
- Enlarge their understanding of the world, people, experiences, and ideas.
- Increase their competencies and skills in oral language, literacy, writing, listening, and thinking.
- Increase their competencies and skills in mathematical reasoning and scientific exploration.
- Increase their skills involved in physical coordination and gross and fine motor skills.
- Increase their competence in dealing with emotions, feelings, and social situations.
- Increase their self-direction and independence.
- Develop cooperative, trusting relationships.
- Develop their natural curiosity and creative potential.
- Develop a love of learning.

### Improve their self-concept.

### Increase their intellectual growth.

### Enlarge their understanding of the world, people, experiences, and ideas.

### Increase their competencies and skills in oral language, literacy, writing, listening, and thinking.

### Increase their competencies and skills in mathematical reasoning and scientific exploration.

### Increase their skills involved in physical coordination and gross and fine motor skills.

### Increase their competence in dealing with emotions, feelings, and social situations.

### Increase their self-direction and independence.

### Develop cooperative, trusting relationships.

### Develop their natural curiosity and creative potential.

### Develop a love of learning.

Parent Leadership Manual
A guide to developing and encourage parent leaders written by the Georgia Department of Education.

WIN Job Centers
WIN Job Centers are service centers that offer programs and resources geared toward your job seeking and claim needs and are partners in the American Job Center Network.
https://mdes.ms.gov/win-job-centers/
GOAL 4
To connect families to their peers, all school personnel, and community partners for continuous support, encouragement, and resources.

Creating full, equal, and equitable partnerships is a shared responsibility that requires systemic change in policy, resources, and practice. Families, educators, and community partners need and want opportunities to develop their capacity to work together – to build trusting relationships, strengthen their confidence, expand personal networks, and deepen their understanding and core beliefs about family engagement.

Families are their child’s first teachers. Educators should create collaborative relationships with a variety of service entities to support and empower the family in its role as their child’s first teacher. Personal and community networks are a key source of support for families with young children. Learning from one another and sharing common experiences can inform families about resources, expand caregiving strategies, and offer a source of comfort. Educators should support families to form connections with peers and mentors in formal or informal social networks that are supportive and enhance social well-being and community life.

Families, schools, and communities are partners in education. Together they make educational decisions for children; are represented on state, district, and school-level committees regarding academic policies and programs; create and share an understanding of child/adolescent development; advocate for the success of all children, schools and community members; and work collaboratively, connecting students, families and staff to expand learning opportunities and community services. Through shared decision-making, advocacy, and community engagement, schools, families, and communities share the responsibility to strengthen schools and positively support student success.
OUTCOMES
Develop Community Investment and Partnerships

To connect families to their peers, all school personnel, and community partners for continuous support, encouragement, and resources.

- Obtain knowledge and skills to connect families with peers and community resources.
- Obtain knowledge and skills to help families make effective transitions to kindergarten and between schools.
- Collaborate and/or provide subgrants to schools. This allows schools to collaborate with community -or other organizations with a record of success in improving and increasing family engagement.
- Exchange knowledge and resources to gain a sense of confidence and empowerment through interactions with other families.
- Reach out to other families to solve problems and support their decision making.
- Be aware of who to contact in their community when questions or needs arise.
- Understand and respond effectively to their children’s behavior.
- Use positive parenting practices that support the stages of their children’s learning and development.
- Understand how to ensure the health and safety of their children.
- Seek out services and supports for their child’s cognitive, developmental, and behavioral challenges.
- Access community resources to meet their safety, health, and financial needs, as needed.
- Improve their self-concept.
- Increase their intellectual growth.
- Enlarge their understanding of the world, people, experiences, and ideas.
- Increase their competencies and skills in oral language, literacy, writing, listening, and thinking.
- Increase their competencies and skills in mathematical reasoning and scientific exploration.
- Increase their skills involved in physical coordination and gross and fine motor skills.
- Increase their competence in dealing with emotions, feelings, and social situations.
- Increase their self-direction and independence.
- Develop cooperative, trusting relationships.
- Develop their natural curiosity and creative potential.
- Develop a love of learning.

Family Engagement Self-Assessment

Effective family engagement practices will impact the lives of children, families, administrators, educators, and communities for many generations to come. Family engagement exists as an integral, ongoing component of many systems that considers the strengths, needs, and well-being of families to impact the academic success of a child. Family engagement does not exist in a vacuum, yet as part of a larger growth continuum spanning birth to adulthood.

This self-assessment is a guidance document to identify family engagement practices in place in a learning community. Its purpose is to help learning communities identify specific strategies to engage families and create a foundational level understanding of family engagement. This will aide in sustaining focused and intentional family engagement to reach programmatic outcomes for children and families. As you complete the self-assessment, use it to identify your strengths and identify areas of growth and development that need more direct attention. The data you gather through this process will assist learning communities in strategic planning and continuous implementation of practices to impact student success.

Please use the following key when completing Self-Assessment:

- Emerging – site is developing plans to meet goal
- Progressing – actions are taking place to meet goal
- Mastery – site meets and exceeds aspects of goal
- N/A – not applicable to site
## GOAL 1 Welcome and Empower ALL Families

- **Program staff implement a program that is easy to navigate and welcoming to families that encourages them to visit and participate and volunteer in diverse program activities, as well as share information relevant to family cultures and traditions.**

- **Program staff provide resources to families to support and empower a safe, healthy, and stable life for families and children to thrive.**

- **Program staff contact families at the start of each year, use a variety of formal and informal strategies to get to know about family structure, culture and traditions, preferred child-rearing practices and information families wish to share, and actively use this information to adapt its environment, curriculum, and teaching methods to the families they serve.**
Program staff have a system in place for maintaining regular, ongoing, two-way communication with families about children’s activities, shared care-giving issues, and developmental milestones. The purpose is to ensure a smooth transition between home and program.

Program staff use a variety of formal and informal quality methods to communicate with families about the program philosophy and curriculum objectives. These include the educational goals and effective strategies that can be used by families to promote their children’s learning. Methods may include family handbooks, regular family conferences, home visits, newsletters, orientation, and/or family meetings.

Program staff incorporate family feedback into any plan developed to address child assessment results, child concerns, and how that will have an impact on their child. When challenging behaviors arise, program staff collaborate with families to develop and implement an individualized plan that supports the child’s inclusion and success. Staff offer the family frequent updates on implementation of the plan.
